**Development** Ilse Oosterlaken, 2015-05-15 This book introduces the capability approach in which wellbeing agency and justice are the core values as a powerful normative lens to examine technology and its role in development This approach attaches central moral importance to individual human capabilities understood as effective opportunities people have to lead the kind of lives they have reason to value The book examines the strengths limitations and versatility of the capability approach when applied to technology and shows the need to supplement it with other approaches in order to deal with the challenges that technology raises The first chapter places the capability approach within the context of broader debates about technology and human development discussing amongst others the appropriate technology movement The middle part then draws on philosophy and ethics of technology in order to deepen our understanding of the relation between technical artefacts and human capabilities arguing that we must simultaneously zoom in on the details of technological design and zoom out to see the broader socio technical embedding of a technology The book examines whether technology is merely a neutral instrument that expands what people can do and be in life or whether technology transfers may also impose certain views of what it means to lead a good life The final chapter examines the capability approach in relation to contemporary debates about ICT for Development ICT4D as the technology domain where the approach has been most extensively applied so far This book is an invaluable read for students in Development Studies and STS as well as policy makers practitioners and engineers looking for an accessible overview of technology and development from the perspective of the capability approach

**The Jungian Art. The Jungian Persona in Shakespeare's works** Aleksandra Vujovic, 2022-01-28 Document from the year 2021 in the subject English Language and Literature Studies Literature grade A language English abstract This work deals with various characters from Shakespeare's works and analyses them according to the Jungian Art In the individuation process Shakespeare sides with Jung related to the role and importance of the concept of free will None of Shakespeare's heroes follow their fate as an externally imposed inevitable chain of events which lead to their doom Rather it is their lack of

self knowledge and self control as a sign of their failed individuation that causes their tragic ends These characters embody a soul which is in many ways great and noble but which has a fatal flaw which plays the role of fate In Jungian terms fate can be interpreted as unrecognized psychological processes or archetypes that are not dealt with which therefore influence or lead the actions of the ego conscience Shakespeare explores in depth these flaws to which the tragic hero after an inner conflict fails to attempt to deal with the archetypal psychic forces The result is that the tragic hero loses his soul the link to the archetype of Self as both the motivator and the goal of the individuation process In that regard when we examine for example Othello it is obvious that the cause of his crisis and ruin is psychological and that his intellectual confusion is not the cause but rather the result of the chaos in his psyche In Jungian terms Othello as the ego consciousness struggles and fails to understand and establish a functioning relationship with both Iago and Desdemona respectively seen as his shadow and anima The importance of dealing with these archetypes as a means of reaching psychic balance as one of the indicators of a successfully ongoing individuation process is described from a Jungian point of view Current Literature ,1895
