astronomer or a curious novice let *Celestial Alignment* be your guide to understanding the eternal dance of Sun Moon and Earth that captivates us all *Astronomy in the Ancient World* Alexis McLeod,2016-06-17 Alexis McLeod explores every aspect of the lesser known history of astronomy in the Americas Mesoamerica and North America China and India each through the frame of a particular astronomical phenomena Part One considers the development of astronomy in the Americas as a response in part to the Supernova of 1054 which may have led to a cultural renaissance in astronomy He then goes on to explore the contemporary understanding of supernovae contrasting it with that of the ancient Americas Part Two is framed through the appearances of great comets which had major divinatory significance in early China The author discusses the advancement of observational astronomy in China its influence on politics and its role in the survival or failure of empires Furthermore the contemporary understanding of comets is also discussed for comparison Part Three on India considers the magnificent observatories of the Rajput king Jai Singh II and the question of their purpose The origins of Indian astronomy are examined in Vedic thought and its development is followed through the period of Jai Singh including the role played by solar eclipses The author also includes a modern explanation of our understanding of eclipses to date In the final section of the book McLeod discusses how ancient traditions might help modern civilization better understand Earth s place in the cosmos *Saros Cycle Dates and Related Babylonian Astronomical Texts* Asger Aaboe,1991 These texts are probably from Babylon although their exact provenance is unknown All concern luni solar phenomena with the exception of a text on the last visibility of Mercury which is found on one side of a tablet whose other side deals with lunar eclipse magnitudes the other treats solar eclipse possibilities Included in this group is B M 34597 known as the Saros Canon which is repub to correct errors in previous pub to clarify its structure The 2nd group contains astronomical functions Illustrations *The Observatory* ,1917 A review of astronomy varies *Who Built the Moon?* Christopher Knight,Alan Butler,2014-03-11 The authors of *Civilization One* return present new evidence about the Moon that will shake up our world What if the Moon isn t a natural object but an artificial construct Christopher Knight and Alan Butler realized that the ancient system of geometry they presented in their earlier breakthrough study works as perfectly for the Moon as it does the Earth On further investigation they found a consistent sequence of beautiful integer numbers when looking at every major aspect of the Moon no such pattern emerges for any other planet or moon in the solar system Knight and Butler also discovered that the Moon possesses few or no heavy metals and has no core something that should not be possible Their persuasive conclusion if higher life only developed on Earth because the Moon is exactly what it is and where it is it becomes unreasonable to cling to the idea that the Moon is a natural object The only question that remains is who built it *Electrodynamics Wave-theory of Physical Forces* Thomas Jefferson Jackson See,1917 *Electrodynamic Wave-theory of Physical Forces ...* T.
