Thinking Through Mathematics Edward A. Silver, Jeremy Kilpatrick, Beth Schlesinger, Dennie Wolf, 1990 This document focuses on how mathematics teaching and learning can be improved by developing more powerful approaches to connect thinking and mathematics It proposes changing perspectives on what it means to learn and do mathematics and explores how these perspectives can be incorporated into the teaching of secondary school mathematics Chapter 1 offers a view of mathematics as emerging largely from individual and social activity rather than from textbooks worksheets and tradition The learner is depicted as someone who actively constructs meaning instead of passively receiving it Chapter 2 considers how a greater emphasis on communication discussion debate recording and writing stimulates and uncovers students learning and thinking and leads to a deeper understanding by both teachers and students Chapter 3 explores how teachers might encourage greater inquiry and communication in a secondary school class by making minor but thought provoking changes in ordinary problems and situations Finally chapter 4 gives some practical advice on transforming the mathematics classroom into a place where students are expected not only to absorb and consume mathematics but also to produce and think about it Contains 17 references and 17 figures MKR *Thinking Through Writing* Susan R. Horton, 1982-03 Many writers even experienced ones admit that one of the most frightening objects in their world is a blank piece of paper Susan Horton feels that too many teachers students and writers themselves make writing harder than it needs to be So much emphasis is placed on form and grammar the rules of the game so to speak that the essence of the writing process the sheer joy of saying something new is lost Thinking Through Writing is in Horton s words a Back to Basics book but one with a twist I m talking about the real basics she says Not grammar but basics like what writing is and is for how you get an idea and how and why each idea demands its own kind of organization and how ideas turn into essays and even more basic about how your mind forms ideas in the first place You can use this book with or without a teacher in front of you It is put together not to tell you what to do or how to write as much as it is designed to set things up so you can discover for yourself how writing works yours and everybody else s and in the process how your mind works as well It s a kind of watch yourself think book There aren t many answers in it but there are lots of questions lots of things to try to explore and

discover and play with Even more than that this is a book that tries to teach you not just how to answer questions but how to find questions to ask As a writer and teacher of writing for more than a decade Horton knows firsthand the anxieties frustrations challenges and rewards that are an integral part of that exciting craft She also has extraordinary insight into the writing process itself and it is that insight that she attempts to communicate in *Thinking Through Writing* Sharp declines in standardized composition test scores and classroom performance during the past decade have created a literacy panic among educators and parents alike As a result composition is gaining a new prominence as an academic discipline Horton s approach to the subject emphasizing understanding oneself and one s craft rather than fear of error is distinctive original and most of all effective Anyone who wants to learn how to write how to think and how thinking and writing are related will want to read this book

Writing and Reading Differently George Douglas Atkins, Michael L. Why White Rice? Dow Et Al, Eric R. DeVillez, 2010-08-30 When we write we also engage in conversations with other

writers The writers are expressing ideas sharing opinions working through problems agreeing and disagreeing The writers of Why White Rice embrace this idea fully but also move past just saying it they demonstrate it through a book that is a conversation on writing distinct and honest voices contending with one another responding to each other and working through problems This book on writing comes from four community college teachers with different backgrounds and training with contributions from students as well in a collection of voices that speaks directly to students and writers It drops the pretense of traditional textbooks and talks honestly with students in a way that has them reading and responding in some surprising ways Reading this book is like sitting down with that teacher who cared enough to tell it to you straight to be honest with you Even if it stung a little you knew she was right and you listened About the Author The book features four authors all community college teachers all writers but each with different training and backgrounds Eric DeVillez holds an MFA in creative writing from Roosevelt University Tom Dow has a PhD in literature from Loyola University Michael McGuire holds an MA in rhetoric and composition from Northeastern Illinois University and Troy Swanson holds a PhD in community college leadership from Old Dominion University and holds a Masters of Library and Information Science from Dominican University This blend of academic training and experience brings very different and often competing perspectives on writing which adds to the lively conversation of the book itself Pedagog The book teaches by example It models effective writing in a variety of ways while addressing the subject of writing itself It models writing and research quite literally through a conversation of ideas The text also features chapter summaries focus boxes to highlight key points and a comprehensive index to make it easy for readers to locate typical and less typical topics in writing as they are addressed throughout the conversation of the text The book can be read in sequence from beginning to end by chapter in any order or by writing topic as located through the table of contents and index The brief response pieces are quite effective for classroom teaching as they seem to predict many questions comments and challenges raised by students These response pieces are short enough to read in the classroom and offer a springboard to rich conversation
