workplace this book also addresses the experiences of secondary responders including managers human resources staff unions humanitarian aid workers and their training and support needs *The Violent Workplace* P. A. J. Waddington, Douglas Badger, Ray Bull, 2006 Based on interviews and organizational research this book examines workplace violence in four of Great Britain's most violence prone occupations the police accident and emergency personnel social workers and mental health professionals The central finding for all the occupations is that the problem is less one of the frequency of actual physical attacks although they do occur but more of ongoing anxiety regarding their possibility Linked to this is the sense of vulnerability in performing occupational duties There are aspects of the roles of all four professions that place them in potentially volatile situations Although employees can be trained to reduce the likelihood of an escalation toward violence employees must be trained in how to deal with various types of violence as they occur Further managers should not assume that when violence does occur it is because the employee did not act appropriately to prevent it The book concludes that the problem of workplace violence in the professions examined is so complex and diverse that there are no quick fixes What is clear is that the problem exists and causes considerable anxiety among workers Employing organizations must recognize this and address it in workplace policies and procedures *Report*, 2001 *Publications Catalogue* International Labour Office, 2000 **The Hospital Safety Director's Handbook** Kenneth Steven Weinberg, 2003
