Violent Couple:

Toxic Couples: The Psychology of Domestic Violence Anna Motz, 2014-04-03 Domestic violence is a major public health concern affecting millions worldwide. It is underreported, often devastating, and sometimes ends in murder. In *Toxic Couples: The Psychology of Domestic Violence*, Anna Motz integrates psychological and criminological data with clinical illustrations and discussion of current high-profile cases. She examines the complex manifestations and multiple causes of intimate partner violence. Motz disentangles the roles played by those involved and examines the addictive nature of these damaging partnerships. The book describes various forms of abuse, including physical, sexual, and emotional, and analyses how intimate partner violence can escalate to murder. She explores important factors, including the role of addiction, homelessness, and vulnerability, the intergenerational transmission of abuse, sadomasochistic relationships, and honour-based violence. The book emphasizes the significance of female as well as male-perpetrated violence and outlines the powerful impact on the children of abusive parents, extending the clinical awareness of professionals working with those affected. *Toxic Couples: The Psychology of Domestic Violence* is ideal for clinicians working with the victims and perpetrators of intimate partner violence, for students of psychology, gender studies, and social care courses, and for anyone interested in the psychological forces behind violence in relationships.

LGBTQ+ Intimate Partner Violence Susan Holt, Amir Ahuja, 2024-07-25 This book explores the unique issues involved in assessing, diagnosing, intervening, and treating intimate partner violence (IPV) in the LGBTQ population. Currently, there is little to no instruction regarding this topic in training programs, and this volume is the culmination of an effort to remedy this deficit. The authors draw upon clinical examples and research from the IPV programs in their own organization, as well as external research, to provide a comprehensive overview. Chapters span topics that include definitions of IPV, its history, relevant issues within the LGBTQ community, the unique facets of LGBTQ IPV, and its assessment and diagnosis. Case examples indicate how an assessment should be carried out and how to develop appropriate and effective interventions and treatment plans. This book will empower clinicians to assess for and treat LGBTQ IPV whenever and wherever they encounter it.

Dynamics of Family and Intimate Partner Violence Irene Hanson Frieze, Christina E. Newhill, Rachel Fusco, 2020-05-19 This book provides a research-based analysis of the dynamics of several types of violence in families and close relationships, as well as a discussion of theories relating to the experiences of victims. Drawing on recent research data and case studies from their own clinical experiences, the authors examine causes, experiences, and interventions related to violence in various forms of relationships, including children, elders, and dating or married couples. Among the topics covered are causal factors in aggression and violence, theories of survivor coping and reactions to victimization, interventions for abused women and children, other forms of family violence, elder abuse, sibling abuse, and animal cruelty. Societal responses to abuse in the family. *Dynamics of Family and Intimate Partner Violence* is a crucial resource for practitioners and students in the fields of psychology and social work, vividly tying together theory and real-life case studies.

Stacey, Lonnie R Hazelwood, Anson Shupe, 1994-04-27 This book offers a social movement perspective on family violence framing the discovery of abuse toward women and men as a natural development flowing out of social movements of the 1960s and 1970s It combines clinical and statistical methods to yield a sophisticated understanding of the dynamics underlying spousal violence It examines both men's violence and the violence of their female partners both psychological as well as physical The problem of women's violence is one that has remained largely ignored compared to the mountain of research on men's violence toward women The authors present the first in depth examination of how when and why women instigate violence and why violent couples require a systems level intervention program rather than simply trying to counter male violence There is a strong consideration of factors that can work to reduce or eliminate the problem

Violent Men, Violent Couples Anson D. Shupe, William A. Stacey, Lonnie R. Hazlewood, 1987 This book profiles the characteristics and causes of violence between husbands and wives then describes a systems approach for counselling spouse abusers The research is based on a sample of 241 known violent men supplemented with information on 542 others The analysis considers the men s motives their social circumstances their demography and their feelings about the victims and their own violence Similar information obtained from a literature review is presented for violent wives Among the causative factors identified are stress previous learning and traumatic childhood experiences The study illuminates the culture of male violence exploring why violence in active military families is three times as severe as that in civilian families and the fact that religion is an underused resource for addressing the problem The systems approach to counselling spouse abusers focuses on both persons in a violent relationship and emphasizes multiple causes The treatment mode is matched to the severity and extent of violence as well as the context in which the violence occurs NCJRS modified
