and non probability sampling methods were applied The collected data was analyzed through narration and descriptive analysis method Bole Lemi IP has played role in achieving social development of the urban community through the provision of infrastructure and services to the previously underserved community But the social development opportunity brought by this industrialization is unequal since communities living around the IP are still deprived of basic services and infrastructure This is due to lack of integration between industrialization and urban development The relocated households have been introduced with structural change in their way of life however they become exposed to the risk of impoverishment Even if part of the urban community i e relocated households has become vulnerable to economic hardship and industrial employees remained the working poor the IP is playing significant role for economic development To boost the role of industrialization for holistic urban development creating strong integration between industrialization and urban development and building synergy between different government institution and their goals is a must This is because swinging together with different feathers is not the choice that can be made it is obligatory instead
