Advierte CTM: 800 mil empleos están en riesgo

La Confederación de Trabajadores recuerda que el primer recorte fuerte ya lo hizo GM

La imposición de un arancel de 25 por ciento a las exportaciones mexicanas de acero y aluminio que van a EU pone en riesgo a 800 mil trabajadores sindicalizados que se encuen-

tran en los sectores automotriz, autopartes, metal-mecánica y metalúrgica, advierte Teresa Medina Ramírez, secretaria general adjunta de la Confederación de Trabajadores de México.

“Solo la industria automotriz genera un millón de empleos con armadoras y proveedores en toda la cadena productiva. Los 800 mil trabajadores son de todos los sindicatos de la CTM en los diferentes estados. La preocupación es que las plantas armadoras relocalicen parte de sus actividades y se regresen empleos a los Estados Unidos si se aplica el 25

por ciento de aranceles”, dice. En entrevista con El Sol de México explica que el primer recorte laboral se vivió en General Motors en Ramos Arizpe, Coahuila, donde se canceló el tercer turno y se despidieron mil 200 trabajadores, mientras en la industria de autopartes son 400 personas despedidas (300 en Morelia y 100 en Ciudad Acuña). **Pág. 14**

Es obvio el freno de inversiones

La presidenta Claudia Sheinbaum reconoció este lunes que hay inversiones extranjeras hacia México que están paradas debido a la amenaza de su contraparte en Estados Unidos, Donald Trump, de imponer aranceles de 25 por ciento a los productos hechos en el país. “Eso es obvio, ¿no? (...) Muchas inversiones están esperando a ver qué tipo de arancel, cómo se pone”. **Pág. 12**

Sol Over Mexico Aage Krarup-Nielsen, 1937 **The Provincial Deputation in Mexico** Nettie Lee Benson, 2014-05-16

Mexico and the United States each have a constitution and a federal system of government. This fact has led many historians to assume that the Mexican system of government established in the 1820s is an imitation of the U.S. model. But it is not. In this interpretation of the independence movement, Nettie Lee Benson tells the true story of Mexico's transition from colonial status to a federal state. She traces the Mexican government's beginning to events in Spain in 1808-1810 when provincial juntas or deputations were established to oppose Napoleon's French rule and govern the country during the Spanish monarch's imprisonment. These provincial deputations proved so popular that ultimately they became the established form of government throughout the provinces of Spain and its New World dominions. It was the provincial deputation, not the United States federal system, that provided the model for the state legislative bodies that were eventually formed after Mexico won its independence from Spain in 1821. This finding, the result of years of painstaking archival research, strongly confirms the independence of Mexico's political development from U.S. influence. Its importance to a study of Mexican history cannot be overstated.

Born in Mexico City in 1914, writer, poet, and diplomat Octavio Paz won the Nobel Prize for Literature in 1990, eight years before his death in 1998. *The Writing in the Stars* explores Paz's life and ideas by establishing a dialogue between the structure and recurring images of his major poems and the ideas of Carl Jung. Although other literary critics have pointed to Jungian concepts in Paz, a comprehensive study on the subject has yet to be undertaken. Rodney Williamson takes up this challenge, adopting a Jungian perspective to explore successive phases of Paz's poetry. Williamson illustrates how archetypal images infuse Paz's early poetry and his surrealist period and shows how the circular structure of Paz's longer poems, such as *Piedra de sol* and *Blanco*, are based on the Eastern sacred circle or mandala, a major archetype of psychic wholeness in Jung. He argues that a grasp of the psychological importance of Jung's archetypes is essential to understanding the various syntheses of creative truth and existence sought by Paz at different defining moments of his career as a poet. *The Writing in the Stars* will prove fascinating to anyone interested in Latin American literature, Jungian psychology, or critical theory.
