The Human Self:

Human Self Athar Saeed Naqvi, PhD, 2018-02-20 Unlike most theories of the human self that are generally based on conjecture this book describes a new scientific theory of the human self and its states of consciousness This theory is formulated using the revealed knowledge found in the Holy Scriptures along with the principles of physics In a quest for the ultimate truth the book attempts to understand the relationship between man and his Creator Dr Naqvi describes the universal principle of complementarity of creation that shows that the world of matter is not mutually exclusive to the spirit world but both are complementary to each other The three major holy scriptures of monotheistic faith describe the human spirit as a breath from the spirit of God It is termed divine spark in man The book explains that the divine spark is a seed of divine attributes of truth goodness compassion and justice A major outcome of this notion is that all humans are equal members of the family of God irrespective of race color or creed and deserving mutual respect and compassion Questions are answered about the origin of human spirit purpose of human creation spirit matter interaction and the basis of ethics Findings of prominent neurosurgeons show that the spirit soul is an autonomous entity that can exist without a physical vehicle which takes the inquisitive reader into a mind blowing conclusion This book is a response to the growing need among academics and thinking masses for scientific explanations of spirituality psychology philosophy mysticism religion and paranormal phenomena Over the past twenty five years the author has presented the theory in various universities in psychology and theology departments globally This book may serve as course material for university level psychology philosophy and theology departments In brief the unique theory presented in this book can be described as the science of spirituality The Human Self William Paul Meacham, 1968 **Creative Virtualities in Human**

Self-Interpretation-in-Culture Anna-Teresa Tymieniecka, 2012-12-06 It would seem that modern humanity has unthroned the human spirit undercutting the very foundation of the validity of truth moral values and principles There appears to be no attempt to discern what is beautiful and true it is functional and pragmatic usefulness that seem to dominate human evaluations and transactions with other humans and indeed animals Humanity is becoming detached from the higher aesthetic moral and intellectual works of the human spirit and thus the life of the spirit is often situated on the other side of a gulf opposed to science with its rationality Culture is in danger of becoming reduced to science In other words the great metaphysical questions those of telos of sense often are answered in terms of scientific conceptions But these are at least incomplete if not fragmentary and in principle hypothetical which still leaves the questions unanswered But it is culture that is the manifestation of the human spirit being the historical process of human self interpretation in existence All manifestations of the creative forge of the human being find a role in the fabric of culture which involves progressively widening circles of the human community demanding an integration and attunement with others in their changing conditions of life This consideration of culture involves all areas of philosophical reflection moral aesthetic metaphysical epistemological
