The Process Of Intuitional Knowing:

Analytics and Intuition in the Process of Selecting Talent Jürgen Deters, 2022-11-07 Human decisions especially in management and personnel selection are based on making judgments about people analytically and intuitively Yet in business and scientific contexts judgments are expected to be based on a rational analysis rather than intuitions or emotions Intuition is often seen as something mystical that should not be trusted and thus eliminated from human decision making Our empirical and theoretical research shows that this is impossible when people are dealing with people Instead intuitions and emotions have significant power in the decision making process Neuroscience even shows that humans are incapable of switching off their emotions or intuitions when making decisions Therefore intuition and emotions as evolutionary achievements of human beings should be looked at more closely to use the wisdom they offer This book provides an insight into the current state of research on rational analytical procedures in personnel selection and complements this with research on intuitions and emotions in personnel diagnostics By integrating scientifically verifiable rational analytical decision making procedures with the inner experiential knowledge of people this book bridges two complementary ways of recognizing and making good decisions It demonstrates how intuitions are developed and used in different fields of practice and cultures and how scientific research results from rational analytical and intuitive emotional selection procedures are successfully integrated by practitioners

Phenomenology of Human Understanding Brian Cronin, 2017-05-09 The problem of human knowing has been foundational for the enterprise of philosophy since the time of Descartes The great philosophers have offered different accounts of the power and limits of human knowing but no generally acceptable system has emerged Contemporary writers have almost given up on this most intractable issue In this book Brian Cronin suggests using the method of introspective description to identify the characteristics of the act of human understanding and knowing Introspection far from being private and unverifiable can be public communal and verifiable If we can describe our dreams and our feelings then we can describe our acts of understanding Using concrete examples one can identify the activities involved namely questioning researching getting an idea expressing a concept reflecting on the evidence and inferring a conclusion Each of these activities can be described clearly and in great detail If we perform these activities well we can understand and know both truth and value The text invites readers to verify each and every statement in their own experience of understanding This is a detailed and verifiable account of human knowing an extremely valuable contribution to philosophy and a solution to the foundational problem of knowing

Fulbright Labyrinths Virginia Hall-Milhouse, 2011-11-28 In this provocative work Virginia Milhouse demonstrates how autoethnography combines creative and analytical practices to help bring to consciousness some complex social and political agendas hidden in narratorial writings It demonstrates how an arts based qualitative research method narrative inquiry can be fused with a scientific based quantitative method DMIS IDI and compliment support and or correct each other It also demonstrates how writing as a

method of inquiry can be a viable way for researchers to learn about themselves and their research as well as features standards for evaluating creatively and analytically constructed text Further the author s examination of the aesthetics of inner readiness and in betweenness will be very helpful to people doing this kind of self reflexive fieldwork The reader will also appreciate this author s recognition of the importance of combining qualitative and quantitative methodologies something not many writers can do with great success Also this book will be a real contribution to sojourners and others traveling or living abroad The work is very smart and is beautifully and clearly written The labyrinth quote at the beginning of her work is very fitting and certainly promises to illustrate those words
