

ENVIRONMENT

Environment refers to the surroundings or conditions in which a person, animal, or plant lives or operates.

Everything on Earth is part of the environment: living things and non-living things.

The main functions of the environment are: provides the supply of resources, sustains life, assimilates waste and enhance the quality of life.

Some of the major environmental problems that we are facing today are: global warming, ozone depletion, air and water pollution and destruction of forests.

Think About The Environment:

How to Think Seriously About the Planet Roger Scruton, 2012-06 Roger Scruton here makes a plea to rescue environmental politics from the activist movements and to return them to the people The book defends the legacy of home building and practical reasoning with which ordinary human beings solve their environmental problems and attacks the alarmism and hysteria that are being used to uproot these resources while putting nothing coherent in their place How to Think about the Climate Crisis Graham Parkes, 2020-11-26 Choice Outstanding Academic Title 2021 Coping with the climate crisis is the greatest challenge we face as a species We know the main task is to reduce our emissions as rapidly as possible to minimise the harm to the world's population now and for generations to come What on earth can philosophy offer us In this compelling account of a problem we think we know inside out the philosopher Graham Parkes outlines the climatic predicament we are in and how we got here and explains how we can think about it anew by considering the relevant history science economics politics and for the first time the philosophies underpinning them Introducing the reality of global warming and its increasingly dire consequences he identifies the immediate obstructions to coping with the problem outlines the libertarian ideology behind them and shows how they can be circumvented Drawing on the wisdom of the ancients in both the East Asian and Western traditions as embodied in such figures as Confucius Laozi Zhuangzi Dogen Plato Epicurus Marcus Aurelius and Nietzsche Parkes shows how a greater awareness of non Western philosophies and especially the Confucian political philosophy advocated by China can help us deal effectively with climate change and thrive in a greener future If some dominant Western philosophical ideas and their instantiation in politics and modern technology got us into our current crisis Parkes demonstrates persuasively that expanding our philosophical horizons will surely help get us out

Time to Think Nancy Kline, 1999-01-01 Most people think they listen well but they rarely do not at this level Listening this way is a radical act The power of effective listening is recognised as the essential tool of good management In this book Nancy Kline describes how we can achieve this and presents a step by step guide that can be used in any situation Whether you want to have more productive meetings solve business problems create bold strategies or build stronger relationships this book offers you a new world of possibilities From blue chip companies developing high powered teams to individuals seeking personal growth a Thinking Environment has come to mean transformation of the highest quality **Proceedings**, 1914 Integrated Experiential Coaching Lloyd Chapman, 2018-03-08 Coaching is growing across the globe as a viable and useful intervention to help executives deal with the complexity they face day to day In response to this increased demand many coaches have presented their model of coaching to the world of business and a number of these have made it into print Few are based on a rigorous development process or have provided the reader with an insight into their development The Author wanted to offer to the readers of our professional coaching series the opportunity to engage with a practitioner who had been through a journey of learning built on their experience the literature and research This book meets the need
