**The Thinking Universe** Edmund E. Sheppard,1915

**The Thinking Universe** Edmund E. Sheppard,2016-06-23 From the author s FOREWORD Infinite Life Universal Mind is the Supreme Power It is the essence of a Force comparable to nothing else which through Reason caused to be Positive by Rightness can be made more fully operative within us and thus bring us Health and Happiness Here and Now as well as There and Then It is the purpose of this work to show how Reason can be made Positive in Rightness This is a dear good old world much as in moments of misery we may think or say to the contrary We know that the universe is not misbegotten or misconducted for everything in it is right but ourselves We are the only things capable of reasoning and as we are the only things that get out of gear with the universe it must be our Reason that is at fault Our mistakes we call sins and we suffer for them We try oh so hard and fail or seem to fail yet the Universal Urge to Rightness that we see working so perfectly in everything about us is also in US There must be a way for us to arrive at Rightness Come let us reason together and we will find it Over half a century ago when the writer was but a wee bit laddie his maiden aunt was in the habit of paying an annual visit to the farmhouse in which he was born Welcome as was her coming it is to be feared that she would not have been so eagerly looked for had it not been for the box of presents which she never failed to bring from the city for us children We were permitted to open the box for ourselves and to select our own belongings What joy Every toy every trinket every book was a treasure of art Is it not possible for you to look into a new book with something of the same expectancy as we peered into Auntie s box The Great Philosophy asserts that unless we become as little children we can in no wise enter the Kingdom of Heaven the State of Harmony We cannot physically or mentally return to the state of childhood but we can retain or bring back if we have lost it our faculty of Image Making We can hold communion with unseen familiars as do children We can be expectant to the point of believing that that which is so intensely hoped for is already ours We can in fact become so aware of what Is as to know It without the aid of indeed in spite of our physical senses It is to be hoped you will read this book in such a spirit What is a book but a parcel of thoughts things wrapped up in printed words The container may be crude but undo the wrapping carefully and you will find something in it for YOU has its vocabulary its jargon As little as possible of this sort of thing has been used without becoming tiresome to the specialists who express in one word what would require an explanatory paragraph This book may be small but it will be found far too large for those who do not try to understand it it will seem just the right size to those who grasp and appreciate its meaning and it will not be too large for those who become interested and determined to weigh its statements by reading it over and over again The thoughts themselves have come out

of the fire of years of suffering and should be as pure as they are joyous in their release Do not open this book with a yawn or a sneer If you are in a mood which makes you feel like tearing something put The Thinking Universe aside till you are in a humor to have a real good think That you will then find that everything in it is for YOU is the wish of

**Philosophy of Mind in the Early Modern and Modern Ages** Rebecca Copenhaver,2018-07-06 The early modern period is arguably the most pivotal of all in the study of the mind teeming with a variety of conceptions of mind Some of these posed serious questions for assumptions about the nature of the mind many of which still depended on notions of the soul and God It is an era that witnessed the emergence of theories and arguments that continue to animate the study of philosophy of mind such as dualism vitalism materialism and idealism Covering pivotal figures in philosophy such as Descartes Hobbes Kant Leibniz Cavendish and Spinoza **Philosophy of Mind in the Early Modern and Modern Ages** provides an outstanding survey of philosophy of mind of the period Following an introduction by Rebecca Copenhaver sixteen specially commissioned chapters by an international team of contributors discuss key topics thinkers and debates including Hobbes Descartes philosophy of mind and its early critics consciousness the later Cartesians Malebranche Cavendish Locke Spinoza Descartes and Leibniz perception and sensation desires mental substance and mental activity Hume and Kant Essential reading for students and researchers in philosophy of mind enlightenment philosophy and the history of philosophy **Philosophy of Mind in the Early Modern and Modern Ages** is also a valuable resource for those in related disciplines such as religion history of psychology and history of science

**Spinoza's 'Ethics'** Steven Nadler,2006-05-25 Spinoza s **Ethics** is one of the most remarkable important and difficult books in the history of philosophy a treatise simultaneously on metaphysics knowledge philosophical psychology moral philosophy and political philosophy It presents in Spinoza s famous geometric method his radical views on God Nature the human being and happiness In this wide ranging 2006 introduction to the work Steven Nadler explains the doctrines and arguments of the

Ethics and shows why Spinoza's endlessly fascinating ideas may have been so troubling to his contemporaries as well as why they are still highly relevant today. He also examines the philosophical background to Spinoza's thought and the dialogues in which Spinoza was engaged with his contemporaries including Descartes and Hobbes with ancient thinkers especially the Stoics and with his Jewish rationalist forebears. His book is written for the student reader but will also be of interest to specialists in early modern philosophy.

Sheppard, 2015-06-27

Excerpt from *The Thinking Universe* Reason as Applied to the Manifestations of the Infinite. The aim of this work is to make comprehensible the Grandeur of the Immobile Intangible Infinite reposing Majestically in its Eternal Unchanging Stillness in Everything as Everything propelling Everything. Its Method is by a proper classification and description of the processes of the human mind to make clear that Right Reasoning must precede Right Thinking which is synonymous with Right Acting. Its Development shows that human beings always eager for health happiness and prosperity finding these things dependent upon the Rightness of their thoughts will become more careful in their Reasoning and thus live cleaner and more reasonable lives. Its Iconoclasm is only that of removing obstacles delaying Man in his progress to Perfection. Its Constructiveness is the convincing of Man of his sufficient equipment to overcome all impediments to his arrival at Positive Rightness. Its Effect by divesting Death of its terrors and the Future Life of its unreasonable dulness must be to cause Man to regard Life Here and Now as a pleasing and profitable incident preparatory to still more pleasing and profitable experiences There and Then. Its Hope is that it may find its way into every home and every life.
