Thinking in Chinese and English David Moser,2026-01-05 Do Chinese and English speakers think differently While the strong version of the Sapir Whorf hypothesis the idea that language determines thought has long been discredited this book offers a more nuanced perspective on whether linguistic differences between Chinese and English influence how native speakers perceive the world Bringing together a multidisciplinary collection of papers from fields such as philosophy translation studies language acquisition and psycholinguistics this volume explores the complex interplay between language and thought in these two languages It will serve as a valuable reference for sinologists linguists and scholars of Asian studies alike

Thinking in Images Piotr Kozak,2023-04-20 What does it mean to think with images There is a well established tradition of studying thought processes through the nature of language and we know much more about thinking with language than about thinking with images Piotr Kozak takes an important step towards rectifying this position Presenting a unified theory of different types of images such as diagrams maps technical drawings and photographs Kozak argues that images provide a genuine and autonomous form of content and knowledge In contrast to the propositional view of thinking and resemblance based accounts he puts forward a measurement theoretic account of images as operations that exemplify measures revealing the outcomes of measurement operations performed on a depicted situation Bringing together insights from philosophy of science picture theory cognitive science and cognitive psychology this book demonstrates that we can only understand what an image is if we truly understand the role they play in our thought processes challenging the prevailing view that the utility of images is only instrumental and cognitively inferior
