Violent Country:

Violent Crime and Insecurity in Latin America and the Caribbean Paul M Bisca, Vu Chau, Mr. Paolo Dudine, Mr. Raphael A Espinoza, Jean-Marc Fournier, Pierre Guérin, Mr. Niels-Jakob H Hansen, Jorge Salas, 2024-11-11 Violent crime and insecurity remain major barriers to prosperity in Latin America and the Caribbean LAC With just 8 percent of the global population LAC accounts for a third of the world's homicides Building on the existing literature this paper aims to support economic policymakers and development partners by exploring the interplay between insecurity and macroeconomic outcomes with emphasis on the relationship between violent crime and growth the business climate and public finances The analysis shows that national level crime indicators mask huge internal disparities and that municipalities with 10 percent higher homicide rates have lower economic activity by around 4 percent The paper develops an innovative measure of insecurity the share of crime related news and shows its association with lower industrial production Using firm level data it also estimates that the direct costs of crime for firms are around 7 percent of annual sales and these are much higher when gangs and drug trafficking organizations are present Violent crime rises with macroeconomic instability inequality and governance problems Using a large cross country panel the analysis finds that homicides increase when a country is affected by negative growth high inflation or a worsening of inequality Victimization surveys indicate that where populations are concerned with the rule of law impunity and police corruption only one in five victims file their case with the police Lack of trust and crime can be mutually reinforcing Finally the paper documents the fiscal burden of security provision and finds that spending tends to be inelastic to crime and that spending efficiency could be improved The paper concludes with policy lessons and areas for additional collaboration between national authorities international partners and key stakeholders These focus on data collection and analysis economic policies that may address the root causes and manifestations of crime strengthening rule of law institutions and intensifying regional exchanges on security and public finance issues

Commodifying Violence in Literature and on Screen Alejandro Herrero-Olaizola, 2021-10-18 This book traverses the cultural landscape of Colombia through in depth analyses of displacement local and global cultures human rights abuses and literary and media production Through an exploration of the cultural processes that perpetuate the darker side of Latin America for global consumption it investigates the condition that has led writers filmmakers and artists to embrace purposefully or not the incessant violence in Colombian society as the object of their own creative endeavors In this examination of mass marketed cultural products such as narco stories captivity memoirs gritty travel narratives and films Herrero Olaizola seeks to offer a hemispheric approach to the role played by Colombia in cultural production across the continent where the illicit drug trade has made significant inroads To this end he identifies the Colombian condition within the parameters of the global economy while concentrating on the commodification of Latin America's violence for cultural consumption The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No

Derivatives 4 0 license **Violence in the Americas** Jonathan D. Rosen, Hanna Samir Kassab, 2018-04-17 Many countries throughout Latin America have experienced high levels of corruption drug trafficking and violence which has created elements of fragility The book is comprises case studies that explore the nature of violence in countries throughout the region Moreover it seeks to address some of the ways in which governments have sought to address violence The cases examined in this volume are quite diverse illustrating different types of violence as all of the countries in Latin America are not the same Countries like Brazil Colombia El Salvador Guatemala and Mexico have high levels of drug trafficking and organized crime Strategies designed to combat drug trafficking organization particularly in Colombia Mexico and Brazil and counter gang strategies in Central America have help foment violence as these various criminal organizations have responded to such government policies Yet other countries like Peru and Bolivia have much lower levels of violence However the perception of insecurity is quite high despite the fact that Peru has one of the lower homicide rates in the country On the other hand the nature of violence in Bolivia is quite different This country does not have a homicide rate like El Salvador but the country has witnessed public lynchings and other forms of violence This volume is an effort to better understand the major trends in political violence in this particularly violent region [Drunk on Capitalism. An Interdisciplinary Reflection on Market Economy, Art and Science](#) Robrecht Vanderbeeken, Frederik Le Roy, Christel Stalpaert, Diederik AERTS, 2011-09-28 The book presents an interdisciplinary collection of analyses that discuss the impact of market economy on our culture in the post Berlin Wall era It contains two parts The first focuses on the commercialisation of science and education The second elaborates on the multiple and diverse relation between art and capital *Processes of Life* John Dupré, 2012-01-26 John Dupr explores recent revolutionary developments in biology and considers their relevance for our understanding of human nature and human society Epigenetics and related areas of molecular biology have eroded the exceptional status of the gene and presented the genome as fully interactive with the rest of the cell Developmental systems theory provides a space for a vision of evolution that takes full account of the fundamental importance of developmental processes Dupr shows the importance of microbiology for a proper understanding of the living world and reveals how it subverts such basic biological assumptions as the organisation of biological kinds on a branching tree of life and the simple traditional conception of the biological organism These topics are considered in the context of a view of science as realistically grounded in the natural order but at the same time as pluralistic and inextricably integrated within a social and normative context The volume includes a section that recapitulates and expands some of the author s general views on science a section addressing a range of topics in biology including the significance of genomics the nature of the organism and the current status of evolutionary theory and a section exploring some implications of contemporary biology for humans for example on the reality or unreality of human races and the plasticity of human nature **Cocaine** Sebastián A. Cutrona, Jonathan D. Rosen, 2025-11-04 This superbly edited volume provides scholars and general readers with an in depth view of the evolution nature dynamics and

consequences of the global cocaine industry Cocaine The Global Reach of the World's Most Lucrative Illicit Drug offers an unprecedented global analysis of the cocaine trade revealing how the world's most lucrative illicit market operates today Unlike previous works that focus on individual countries or regions this volume takes a global view of the cocaine supply chain tracking the drug's journey from coca fields in the Andes to consumers in New York Lagos Rotterdam Sydney and beyond With contributions from leading scholars in criminology sociology and political science it sheds light on the expanding networks of criminal organizations that connect producer countries in Latin America to consumer markets worldwide The book explores the profound transformation of the cocaine market which has shifted from being dominated by a few powerful cartels to a fragmented and highly competitive underworld Colombian and Mexican organizations have traditionally controlled the market but new actors including Brazilian Nigerian and Albanian syndicates have emerged as key players From the rise of transshipment hubs in West Africa to nontraditional trafficking routes in Asia this volume demonstrates how criminal organizations adapt to evolving market demands and law enforcement crackdowns Just as multinational corporations streamline production cocaine traffickers around the world manage logistics transportation and financial flows across continents Yet unlike legal industries the cocaine market thrives on secrecy violence and corruption making it one of the most resilient global enterprises By bridging theoretical frameworks from different disciplines this volume deepens our understanding of how the global illicit economy functions From the campesinos harvesting coca to the street dealers in Europe and the United States the book emphasizes the interconnectedness of all actors in this lucrative dangerous market Furthermore it critiques the failures of international counter drug efforts revealing how institutional corruption and state fragility perpetuate the trade This book is an essential resource for policymakers scholars and anyone seeking to understand the complexities of the global cocaine economy

Votes, Drugs, and Violence Guillermo

Trejo, Sandra Ley, 2020-09-03 One of the most surprising developments in Mexico's transition to democracy is the outbreak of criminal wars and large scale criminal violence Why did Mexican drug cartels go to war as the country transitioned away from one party rule And why have criminal wars proliferated as democracy has consolidated and elections have become more competitive subnationally In *Votes, Drugs, and Violence* Guillermo Trejo and Sandra Ley develop a political theory of criminal violence in weak democracies that elucidates how democratic politics and the fragmentation of power fundamentally shape cartels incentives for war and peace Drawing on in depth case studies and statistical analysis spanning more than two decades and multiple levels of government Trejo and Ley show that electoral competition and partisan conflict were key drivers of the outbreak of Mexico's crime wars the intensification of violence and the expansion of war and violence to the spheres of local politics and civil society

Crime Is Not the Problem Franklin E. Zimring, Gordon Hawkins, 1999-05-27

In *Crime is Not the Problem* Franklin Zimring and Gordon Hawkins revolutionize the way we think about crime and violence by forcing us to distinguish between crime and violence The authors reveal that compared to other industrialized nations in

most categories of nonviolent crime American crime rates are comparable even lower in some cases Only when it comes to lethal violence does the United States outpace other Western nations with homicide rates many many times greater London and New York City have nearly the same number of robberies and burglaries each year but robbers and burglars kill 54 victims in New York for every victim death in London Why are the risks so much greater that victims will be killed or maimed in the United States And what can be done to bring the death rate from American violence down to tolerable levels The authors show how the impact of television and movie violence on rates of homicide is wildly overrated but emphasize the paramount importance of guns By making the crucial distinction between lethal violence and crime in general the authors clear the ground for a targeted far more effective response to the real crisis in American society Crime is Not the Problem will reshape the debate about crime control in the United States India in the Years ...
