Authority Richard Sennett, 1993-06-17 This book is a study of both how we experience authority and how we might experience it differently Sennett explores the bonds that rebellion against authority paradoxically establishes showing how this paradox has been in the making since the French Revolution and how today it expresses itself in offices in factories and in government as well as in the family Drawing on examples from psychology sociology and literature he eloquently projects how we might reinvigorate the role of authority according to good and rational ideals A master of the interplay between politics and psychology Richard Sennett here analyzes the nature the role and the faces of authority authority in personal life in the public realm authority as an idea Why have we become so afraid of authority What real needs for authority do we have for guidance stability images of strength

What happens when our fear of and our need for authority come into conflict In exploring these questions Sennett examines traditional forms of authority The father s in the family the lord s in society and the dominant contemporary styles of authority and he shows how our needs for no less than our resistance to authority have been shaped by history and culture as well as by psychological disposition
