## **Wind Water Work:**

**Wind, Water, Work** Adam Lucas, 2006 This book is the most comprehensive empirical study to date of the social and technical aspects of milling during the ancient and medieval periods Drawing on the latest archaeological evidence and historical studies the book examines the chronological development and technical details of handmills beast mills watermills and windmills from the first millennium BCE to c 1500 It discusses the many and varied uses to which mills were turned in the civilisations of Rome China Islam and Europe and the many types of mill that existed The book also includes comparative regional studies of the social and economic significance of milling and tackles several important historiographical issues such as whether technological stagnation was a characteristic of late Antiquity whether there was an industrial revolution in the European Middle Ages based on waterpower and how contemporary studies in the social shaping of technology can shed light on the study of pre modern technology *Ecclesiastical Lordship, Seigneurial Power and the Commercialization of*

*Milling in Medieval England* Adam Lucas, 2016-04-29 This is the first detailed study of the role of the Church in the commercialization of milling in medieval England Focusing on the period from the late eleventh to the mid sixteenth centuries it examines the estate management practices of more than thirty English religious houses founded by the Benedictines Cistercians Augustinians and other minor orders with an emphasis on the role played by mills and milling in the establishment and development of a range of different sized episcopal and conventual foundations Contrary to the views espoused by a number of prominent historians of technology since the 1930s the book demonstrates that patterns of mill acquisition innovation and exploitation were shaped not only by the size wealth and distribution of a house s estates but also by environmental and demographic factors changing cultural attitudes and legal conventions prevailing and emergent technical traditions the personal relations of a house with its patrons tenants servants and neighbours and the entrepreneurial and administrative flair of bishops abbots priors and other ecclesiastical officials **Reimagining**

**Alternative Technology for Design in the 21st Century** Brook S. Kennedy, 2023-05-30 Reimagining Alternative Technology for Design in the 21st Century presents a new approach to design that harnesses still valuable alternative traditional and abandoned technologies alongside the creation of new ones to address contemporary global problems It focuses on design opportunities that reduce energy and material consumption to tackle issues such as climate change and pollution in industrialized economies The book takes the reader on a journey surveying different facets of human activity to identify underused and discarded technologies that could be indispensable today It critically addresses newer approaches to design and technology by comparing them to existing alternatives unpacking examples including air conditioning with smart thermostats electric lighting durable reusable products domestic maintenance tools and methods of transportation Written for practicing designers and students in industrial design architecture sustainable design and human centered design this book provides new ideas and tools for creating more useful energy and resource efficient product designs and systems

*Medieval Riverscapes* Ellen F. Arnold, 2024-03-28 Focusing on storytelling across centuries Arnold explores how rivers were imagined c 300 1100 and reveals a rich complex medieval world

**A History of Energy Flows** Anthony N. Penna, 2019-09-18 This book presents a global and historical perspective of energy flows during the last millennium The search for sustainable energy is a key issue dominating today s energy regime This book details the historical evolution of energy following the overlapping and slow flowing transitions from one regime to another In doing so it seeks to provide insight into future energy transitions and the means of utilizing sustainable energy sources to reduce humanity s fossil fuel footprint The book begins with an examination of the earliest and most basic forms of energy use namely that of humans metabolizing food in order to work with the first transition following the domestication and breeding of horses and other animals The book also examines energy sources key to development during the industrialization and mechanization such as wood and coal as well as more recent sources such as crude oil and nuclear energy The book then assesses energy flows that are at the forefront of sustainability by examining green sources such as solar wind power and hydropower While it is easy to see energy flows in terms of revolutions transitions have taken centuries to evolve and transitions are never fully global as for example wood remains the primary fuel source for cooking in much of the developing world This book not only demonstrates the longevity of energy transitions but also discusses the possibility for reducing transition times when technological developments provide inexpensive and safe energy sources that can reduce the dependency on fossil fuels This book will be of great interest to students and scholars of energy transitions sustainable energy and environmental and energy history

The Idler ,1910 *Official Report, Annual Convention* National Brick Manufacturers' Association of the United States of America, 1902 *Fifty Years of Medieval Technology and Social Change* Steven A. Walton, 2019-08-22 This volume brings together a series of papers at Kalamazoo as well as some contributed papers inspired by the fiftieth anniversary of the publication of Lynn White Jr s *Medieval Technology and Social Change* 1962 a slim study which catalyzed the study of technology in the Middle Ages in the English speaking world While the initial reviews and decades long fortune of the volume have been varied it is still in print and remains a touchstone of an idea and a time The contributors to the volume therefore both investigate the book itself and its fate and look at new research furthering and inspired by White s work The book opens with an introduction surveying White s career with a bibliography of his work as well as some opening thoughts on the study of medieval technology in the last fifty years Three papers then deal explicitly with the reception and longevity of his work and its impact on medieval studies more generally Then five papers look at new cast studies areas where White s work and approach has had a particular impact namely medieval technology studies and medieval rural ecological studies
