Houck,2024-01-19 Highlights local history to tell a national story about the evolution of the women s health movement illuminating the struggles and successes of bringing feminist dreams into clinical spaces The women s health movement in the United States beginning in 1969 and taking hold in the 1970s was a broad based movement seeking to increase women s bodily knowledge reproductive control and well being It was a political movement that insisted that bodily autonomy provided the key to women s liberation It was also an institution building movement that sought to transform women s relationships with medicine it was dedicated to increasing women s access to affordable health care without the barriers of homophobia racism and sexism But the movement did not only focus on women s bodies It also encouraged activists to reimagine their relationships with one another to develop their relationships in the name of personal and political change and eventually to discover and confront the limitations of the bonds of womanhood This book examines historically the emergence development travails and triumphs of the women s health movement in the United States By bringing medical history and the history of women s bodies into our emerging understandings of second wave feminism the author sheds light on the understudied efforts to shape health care and reproductive control beyond the hospital and the doctor s office in the home the women s center the church basement the bookshop and the clinic Lesbians straight women and women of color all play crucial roles in this history At its center are the politics institutions and relationships created by and within the women s health movement depicted primarily from the perspective of the activists who shaped its priorities fought its battles and grappled with its shortcomings **DHEW Publication** ,1975 **Service operation** Great Britain. Lewis,M.H. Ross,Barbara Berney,Matt Witt,Marc Miller,1978 Three years ago when I first met Talbert Faircloth and his wife Dora I found it very hard to believe the story that they told me Talbert was sick at the time and jobless and angry Two years earlier he had been carried breathless out of the cotton mill on a stretcher never to return to work again I found it hard to believe that thousands of workers in the South s largest and oldest industry could have been afflicted by a crippling disease for years and not have known that they had it or even what caused it In time I learned that Talbert s story like that of 35 000 other Southern textile workers was so wrought with truth and so difficult for the region s most powerful industry to accept that it had been suppressed and ignored

for decades A year ago during a conference at Highlander Center in Tennessee I first heard Les Falk recount his experiences as medical administrator for the United Mine Workers Health and Retirement Fund The conference brought together doctors nurses organizers and health workers from across the South to discuss topics and articles for this health issue of Southern Exposure and to share common experiences in the health field Les Falk s recollections of the UMWA Fund s battles with entrenched coal company doctors during the early 1950s gave our gathering of Southern health activists a sense of rootedness in our region s tradition of struggle and innovation in organizing health care
