international world we live in ranging from security to economics from human rights advocacy to deep fakes and from diplomacy to international law The book makes two sets of contributions First it shows that the ongoing digital revolution profoundly changes every major dimension of international politics Second focusing on the interplay of technology agency and order it provides a framework for explaining these changes The book also provides a map for adjusting the study of international politics to studying International Relations making a case for upgrading augmenting and rewiring the discipline Theory follows practice in International Relations but if the discipline wants to be able to meaningfully analyse the present and come up with plausible scenarios for the future it must not lag too far behind major transformations of the world that it studies This book facilitates that theoretical journey This book will be of much interest to students of cyber politics politics and technology and International Relations
