**Messages from the Small Country Church** Rev. Dr. C. Joseph Fifer, 2014-08-11 In this day and age of bigger and better or bigger is better even our churches are starting to follow suit The alarming trend that is occurring now in America is the assumption that if a group is big it must be right if a church is bigger than others it must be even more right This assumption is not correct This nation was built and became what it is today one small church at a time Many of those small churches are still there today right where they were first necessary And they are still necessary today They are still occupied by Christians who meet on every first day of the week They gather to give the first of their week to worship He who is to be first in Spirit and in truth With this book a compilation of readings sermons observations and an invitation the Reverend Dr C Joseph Fifer Pastor Joe who serves a small country church in rural western Ohio seeks to give voice to the message that millions are now missing

**Explaining Technical Change in a Small Country** Synnöve Vuori, Pentti Vuorinen, 2013-11-21 Technical change is produced by the interaction of a large number of technical economic social and institutional factors One of the starting points is the concept of national innovation systems The aim of this book is to take Finland as an example illustrating the challenges faced by small countries The characteristics and performance of the Finnish national innovation system of the last couple of decades are analyzed The Finnish experience is put in a broader context by comparing it with a few other countries The development paths possible in the near future are assessed According to the results many problems remain despite favourable developments in several technology indicators The rigidities of the social institutions created during the 1970s and 1980s seem to have become obstacles for economic and technological development There are fairly large differences between the countries studied and even between the culturally and historically close Nordic countries However Finland and Sweden seem to share the same kind of encompassing collective risk sharing systems which may have detrimental effects on for instance incentives related to innovativeness Increasing globalisation requires further development of the national system of innovation Technology policy must be seen as one part of more encompassing social and economic policies and the role of factors such as well functioning institutions appropriate education and sound incentive systems is highly important The papers of this book are written by experts of various research disciplines They reflect the respective views on the issue how technical change in Finland can be explained It is also discussed how Finland fares in comparison to Denmark Sweden Japan and the United States

*The Internationalisation Strategies of Small-country Firms* Howard Dick, David Merrett, 2007-01-01 This research project combines contemporary and historical analysis to trace the evolution of Australian multinationals It provides unique insights into how firms from a small economy achieved global competitiveness in their niche markets while examining the barriers that inhibited others The evidence is presented in comparative industry and firm case studies and tells the story of international business made in Australia The longitudinal and multi level analysis in this research provides new insights that challenge the predominance of cross sectional analytical

framework dominating strategic management Any scholars sincerely interested how companies from small countries can succeed on the global stage ought to read this book Klaus E Meyer University of Reading Business School UK The international business literature often struggles to depict a universal experience of internationalisation from the perspective of large countries This book seeks to enrich the literature by providing a nuanced overview of the little known Australian experience being an atypical case of a small to medium sized economy which liberalised rapidly from the 1980s outside any trading bloc Six data rich survey chapters explore Australia s mixed success in founding its own multinationals The experience of Australian firms is set in historical and comparative perspective including interactions with inward and specifically American FDI Five industry studies next consider why firms in retail wine and professional services were more successful than in financial services and shipping Nine detailed case studies of firms then identify the elements of administrative heritage strategy and learning that have been the key to success or failure The book concludes by outlining what can be learned from Australia s example and presenting implications for future research The Internationalisation Strategies of Small Country Firms will appeal to scholars researchers and postgraduate students in international business and international economics
