Small Really Is Beautiful:

Small States and International Law British Institute of International and Comparative Law, 2025-08-28 International law can serve as both a sword and a shield for small States including in the realisation of their rights on the international plane While it can offer a mode of protection to small States and provide opportunities to engage with issues of global concern international law also presents challenges and difficulties for small States in some contexts The chapters in this edited volume explore small States many and diverse interactions with international law in numerous contexts and fora and across a range of thematic areas and issues including climate change disarmament technological development and human rights amongst many others

Are Small Firms Important? Their Role and Impact Stephen Ackermann, 2012-12-06 Are Small Firms Important Their Role and Impact proposes and supports the claim that small firms make two indispensable contributions to the economy First they are an integral part of the renewal process that pervades market economies New and small firms play a crucial role in experimentation and innovation that leads to technological change productivity and economic growth Second small firms are the essential mechanism by which millions enter the economic and social mainstream of American society The public policy implications for sustained economic growth and social well being is the continued high level creation of new and small firms by all segments of society It should be the role of government policy to facilitate that process by eliminating entry barriers lowering transaction costs and minimizing regulation

Beyond Ujamaa in Tanzania Goran Hyden, 2023-11-10 Beyond Ujamaa in Tanzania Underdevelopment and an Uncaptured Peasantry explores the challenges of development and underdevelopment in Africa with a focus on Tanzania s experience during its early socialist years The book critiques the dominant ideologies of development whether capitalist or socialist as being rooted in Western industrial paradigms that often fail to address the realities of pre capitalist African societies It argues that the underdevelopment in Africa is not solely due to excessive penetration by global capitalism but also to capitalism s inability to dismantle the resilient pre capitalist structures in many rural societies The author highlights the role of the Tanzanian peasantry whose economic and social autonomy often resists the centralizing tendencies of modern development presenting them not as mere appendages to the global economy but as key players with their own modes of production and unique societal structures The book is grounded in over a decade of fieldwork and engagement with rural Tanzanian communities enriched by the author s fluency in Swahili and deep involvement in local life It argues for a more nuanced approach to studying African societies one that goes beyond Western assumptions and models By placing the peasant mode of production at the center of analysis the study challenges conventional wisdom and suggests that the primary development challenge in Africa lies not with multinational corporations but with understanding and working within the dynamics of the smallholder peasant economy The author also reflects on the limitations of conventional social science research and calls for greater involvement in the lived realities of the communities studied emphasizing the need for

research methods that are sensitive to local contexts and values The book combines academic critique field observations and a focus on the epistemological biases of Western scholarship to present a compelling argument for rethinking development in Africa This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1980

Co-designing Infrastructures Sarah Bell,Charlotte Johnson,Kat Austen,Gemma Moore,Tse-Hui Teh,2023 Co designing Infrastructures tells the story of a research programme designed to bring the power of engineering and technology into the hands of grassroots community groups to create bottom up solutions to global crises Four projects in London are described in detail exemplifying community collaboration with engineers designers and scientists to enact urban change The projects co designed solutions to air pollution housing the water energy food nexus and water management Rich case study accounts are underpinned by theories of participation environmental politics and socio technical systems The projects at the heart of the book are grounded in specific settings facing challenges familiar to urban communities throughout the world This place based approach to infrastructure is of international relevance as a foundation for urban resilience and sustainability The authors document the tools used to deliver this work providing guidance for others who are working to deliver local technical solutions to complex social and environmental problems around the world This is a book for engineers designers community organisers and researchers Co authored by researchers it includes voices of community collaborators their experiences frustrations and aspirations It explores useful theories about infrastructure engineering and resilience from international academic research and situates it in community based co design experience to explain why bottom up approaches are needed and how they might succeed

Reconsidering Localism Simin Davoudi,Ali Madanipour,2015-01-09 Localism has been deployed in recent debates over planning law as an anodyne grassroots way to shape communities into sustainable human scale neighborhoods But local is a moving category with contradictory nuanced dimensions Reconsidering Localism brings together new scholarship from leading academics in Europe and North America to develop a theoretically grounded critique and definition of the new localism and how it has come to shape urban governance and urban planning Moving beyond the UK this book examines localism and similar shifts in planning policy throughout Europe and features essays on localism and place making sustainability social cohesion and citizen participation in community institutions It explores how debates over localism and citizen control play out at the neighborhood institutional and city level and has come to effect the urban landscape throughout Europe Reconsidering Localism is a current vital addition to planning scholarship
