Studies in Sociology Various, 2022-07-30 This 9 volume collection originally published between 1969 and 1983 contains a selection of subjects viewed through the perspective of sociology including community the family friendship and kinship leisure women and introductory statistics This set will be a useful resource for those studying sociology as well as of interest for other social science courses **Community Studies** Colin Bell, Howard Newby, 2021-10-17 Originally published in 1971 this was the first text on community studies which analysed the major empirical work in this field in a comparative perspective It is concerned both with the sociology of community and the sociology of community studies It takes both the findings of individual studies and the research process itself as significant sociological data in their own right and it asks continually how do we know what we know about communities Community Studies is then not only a contribution to that particular field but also to our understanding of the interaction between theory and method in sociology Studies are analysed from North and Latin America Britain and Western Europe and India Two central problems stratification and power are considered at greater length This book would prove to be an invaluable introduction not only for students of sociology but also for architects planners and all those who had an interest in the community at the time Its authors were and had been actively engaged in field research in this area **Small Towns in Multilevel Society** Frank Wilbur Young, 1999 Small Towns in Multilevel Society introduces an original non economic explanation of how small communities work and how their structure determines the well being of residents It then tests the main proposition using an inexpensive comparative technique to develop a sociological theory and methods package that can be applied anywhere in the world Frank W Young uses data from seventy six towns in five New York counties to test his main propositions as a reply to central place theory and class analysis The author explains that differentiation pluralism and solidarity interact with the mostly economic transaction organizations that do the daily work of the community to determine the average quality of life of the residents Young argues that economic theory takes a secondary role in this assessment His study sets high standards that allow for the systematic comparison of small communities and the correct identification of the multiple levels of structure creating a clear picture of the actual well being of residents in small communities **A Rural Studies Bibliography**, 1994 **Millhands & Preachers** Liston Pope, Patrick. Pope, 1942-01-01 To explore the question of the church s role in Western economic systems Mr Pope presents a pioneering study of the actual role played by the church in the industrial community Gastonia North Carolina He has written a brilliant criticism of the relationship between the textile mills and the churches with broad

implications for industry and church People and Politics in Urban America, Second Edition Robert W. Kweit, Mary G. Kweit, 2013-11-26 First Published in 1998 Approximately 75 percent of Americans live in cities and surrounding suburbs and the characteristics of those cities inescapably affect the quality of their lives This book examines the extent to which these Americans use the political process to control the characteristics of life in their metropolises In addition this second edition revision places great emphasis on the role of political leaders while recognising the interdependence between those leaders and various interests in the city Invisible Crisis of Contemporary Society Bernard S Phillips, Louis C. Johnston, 2015-12-03 Is there a growing gap in today's world between cultural aspirations and their fulfillment a gap that is increasing social problems of all kinds If so what forces are producing that gap How can these forces be changed To answer these questions Phillips and Johnston employ a very broad approach to the scientific method drawing evidence from a wide variety of data and sources including sociologists psychologists political scientists historians philosophers educators psychiatrists and novelists They find substantial evidence for a widening gap suggesting an invisible crisis throughout contemporary society They also find substantial evidence that a simplistic and static metaphysical stance or worldview is largely responsible for that gap and that an alternative worldview can work to close that gap The SAGE Handbook of Qualitative Research Norman K. Denzin, Yvonna S. Lincoln, 2011-04-27 Now in its fourth edition this handbook is an essential resource for those interested in all aspects of qualitative research and has been extensively revised and updated to cover new topics including applied ethnography queer theory and auto ethnography *Medieval Cities* Henri Pirenne, 1925 **Bibliographies and Literature of Agriculture**, 1978 *The Study of Society* Peter I. Rose, 1970 *Controlling Public Education* Kathryn A. McDermott, 1999 Most Americans believe that local school districts are the only means by which citizens may exercise control over public education Kathryn McDermott argues to the contrary that existing local institutions are no longer sufficient for achieving either equity or democratic governance Not only is local control inequitable it also fails to live up to its reputation for guaranteeing public participation and citizen influence Drawing upon democratic theory and the results of field research in New Haven Connecticut and three suburbs McDermott contends that our educational system can be made more democratic by centralizing control over funding while decentralizing most authority over schools to the level of schools themselves while enacting public school choice controlled for racial balance To many people in Connecticut and elsewhere the tension between equal opportunity for all students and local control of public education seems impossible to resolve In 1996 the Connecticut Supreme Court ruled in *Sheff v O'Neill* that local control produces unconstitutional segregation of public schools Nearly all of the state's 169 towns operate their own public schools and like the towns they serve the schools are generally homogeneous with respect to race and socioeconomic class In the *Sheff* ruling the court declared that making school districts coterminous with town lines is the single most important factor contributing to the present concentration of racial and ethnic minorities in the Hartford public school system At the same time the court also acknowledged that the town

based school system presently furthers the legitimate nonracial interests of permitting considerable local control and accountability in educational matters In Connecticut and elsewhere it has often seemed necessary to choose between local control and equity in public education and local control has almost always won McDermott argues that rather than seeing local control and equity as conflicting goals policymakers should regard them as equally important components of democracy in public education In her view a truly democratic system of education should both encourage citizen participation in school governance and contribute to the formation and maintenance of a social order in which equality of opportunity prevails over hierarchies of privilege Centralizing distribution of resources and using controlled choice to end racial isolation would provide greater equality of opportunity while decentralizing management of schools would expand citizen participation McDermott s conclusions break new ground in our understanding of local school governance itself and call into question the conventional wisdom about local participation These findings should interest those who study school governance and reform especially in an urban setting as well as policy makers administrators teachers students and citizens eager to improve their schools

Paving the Way Michael R. Fein,2008 Tells the surprising story of how road construction helped to pave the way to the modern American state Shows how the growing transportation needs of a steadily industrializing population changed political order from local to state and ultimately to federal governance

Life in Society Thomas E. Lasswell,John H. Burma,Sidney H. Aronson,1970 *University of Nebraska Studies* Richard G. Bremer,1976
