study groups agricultural initiatives Waldorf and special education the arts and so much more *The Conquering Soul* Miriam Bostwick, 2000-04 This book will introduce you to a new psychology for the Age of Light We are entering a spiritual evolution in which psychology as we have known it is changing into spiritual psychology to reflect our higher spiritual values The new framework used in the *Conquering Soul* will show you how to align the personality with the soul to become a conquering soul It is an approach that introduces to the personality the ageless spiritual laws of an Infinite Intelligence and demonstrates that once these laws are accepted by the personality the personality can exercise its freedom of choice in a more responsible manner and perform the function for which it was designed to freely serve the soul in the soul's eternal quest to return to the Godhead Showcased are twenty five mental games the personality frequently plays in its attempts to reign supreme over the soul *The Spiral Path of Spiritual Psychology* Edith Betty Schnapper, 1985 *Acts of the Heart* Robert Sardello, 2011-10 Reading through this volume is to be taken on a journey It is to walk with Robert Sardello on his journey as he pushes forward toward new realities In a sense each step is not so easy The thinking often appears dense the ideas often new and therefore disconcerting But each individual piece as the whole is bathed in an aura in a way we may say it is bathed in soul in love in generosity and friendship Attending to these we find the ideas and the new possibilities begin to make sense We are moved to change our lives Christopher Bamford from his introduction In these introductions Robert Sardello introduces us to many people we may not otherwise have met and introduces us to many ways of being and thinking which we didn't know before The range of those we meet in these pages is staggering At the same time there is a sweet harmony and ever unfolding deepening of a single theme Miraculously it pervades and shapes the entire sequence of those whom he presents even though he often wrote in response to a request and not initially on his own initiative Robert writes of matters with which he has made a deep friendship and out of that friendship he has received and participated in a communion of ideas He is able to do this because he has entered the aspiration of those he is introducing at the deepest level making their insights his own and deepening them in his own way An introduction conveys a particular soul capacity For Robert Sardello soul capacities are of the essence of what he calls Spiritual Psychology Together with the worlds and beings to which they correspond it is such capacities that make us human and enable us to fulfill our human tasks Reading these introductions is an astonishing experience Within their short individual compasses they allow us to participate in Robert's own journey to catch as it were the bird in flight and fly with it That is they map his journey at least that portion of it that began to unfold as his destiny began to crystallize Robert Sardello's insights navigate many hazardous abstractions from the so called New Age through the perennial philosophies With Sophia as his muse the current from the future calls him carrying its many imaginations as energy the always immediate now and the truly new Across these authors writings his visionary perspective deepens in dialogue with the different works as authored beings For writings possess their own spirit or how otherwise do they engender a unique spirit when reborn within our own imagination Scott R Scribner from his introduction

From Hilbert to Dilbert Victor Christianto, Florentin Smarandache, 2019 This book took an unconventional theme because we submit an unorthodox theme too Karl Popper's epistemology suggests that when the theory is refuted by observation then it is time to look for a set of new approaches In the first chapter it is shown that Hilbert's axiomatic program has failed not only by experiment Mie theory does not agree with experiment but also in terms of logic G del theorem Therefore we set out a new approach starting from an old theory of Isaac Newton Dilbert cartoon series often offer surprising for old problems especially in this era of corporatocracy Now we would call such an out of the box solution to the old Hilbert axiomatic program as Dilbert way or Dilbertian if you wish Readers may ask but what can physicists learn from Dilbert cartoons While it seems not obvious at first glance yes we believe there is a great character of Dilbert cartoon i e to put it in one phrase out of the box and brutally honest From managers who tend to criticize other folks only to make him/her looks smart Or people who often send FYI emails only to make him/her looks managing well We do think that such a brutal honesty is also needed in many fields of physics from theoretical physics to applied physics as will be discussed throughout this book
