Trusting Teachers with School Success Kim Farris-Berg, Edward J. Dirks, Amy Junge, 2013 Lately our nation's strategy for improving our schools is mostly limited to getting tough with teachers Blaming teachers for poor outcomes we spend almost all of our energy trying to control teachers behavior and school operations But what if all of this is exactly the opposite of what is needed What if teachers are the answer and not the problem What if trusting teachers and not controlling them is the key to school success Examining the experiences of teachers who are already trusted to call the shots this book answers What would teachers do if they had the autonomy not just to make classroom decisions but to collectively with their colleagues make the decisions influencing whole school success Decisions such as school curriculum how to allocate the school budget and whom to hire Teachers with decision making authority create the schools that many of us profess to want They individualize learning Their students are active not passive learners who gain academic and life skills The teachers create school cultures that are the same as those in high performing organizations They accept accountability and innovate and make efficient use of resources These promising results suggest it's time to trust teachers *Teach, Reflect, Learn* Pete Hall, Alisa Simeral, 2015-04-15 It's not the doing that matters it's the thinking about the doing said John Dewey As a teacher you work hard to make a positive difference in the lives of your students But this kind of progress doesn't happen overnight and it doesn't happen accidentally It's the result of intentionality planning effort and thought The difference between learning a skill and being able to implement it effectively resides in your capacity to engage in deep continuous thought about that skill In other words recognizing why you do something is often more important than knowing how to do it To help you deepen your thinking and reflect on your capacity as an educator Pete Hall and Alisa Simeral return to the Continuum of Self Reflection which they introduced to coaches and administrators in their best selling *Building Teachers Capacity for Success* and redesign its implementation so you can take charge of your own professional growth In these pages you'll find tools specifically made to enhance self reflection on professional practice including the Continuum of Self Reflection and the Reflective Cycle You'll be able to assess your current self reflective tendencies identify opportunities to reflect on your instruction and begin to forge a path toward continuous growth and educational excellence *Teach Smart* P J Caposey, Todd Whitaker, 2013-12-17 Transform your classroom from teacher centered to learner centered This book shows you how with eleven easy to implement strategies you can use immediately to put students at the center Get your students geared up for success and high achievement with great ideas for providing a roadmap giving the work back differentiating daily instruction communicating for your audience not to your audience giving students choices planning intentional
