**Thatching and Thatched Buildings** Michael Billett,1979      **Thatches and Thatching** Marjorie Sanders,Roger Angold,2012 Thatches and Thatching examines the building industry s response to thatching issues and its achievements in bringing the craft of thatching into the twenty first century It shows how it has secured a sustainable and viable future for thatch without compromising tradition      Energy Efficiency and Historic Buildings David Pickles,2016-04-29 This guidance provides advice on the principles risks materials and methods for insulating thatched roofs There are estimated to be about fifty thousand thatched buildings in England today some of which retain thatch which is over six hundred years old Thatching reflects strong vernacular traditions all over the country Well maintained thatch is a highly effective weatherproof coating as traditional deep thatched eaves will shed rainwater without the need for any down pipes or gutters Locally grown thatch is a sustainable material which has little impact on the environment throughout its life cycle It requires no chemicals to grow can be harvested by hand or using traditional farm machinery requires no mechanical processing and therefore has low embodied energy and can be fixed using hand tools At the end of its life it can be composted and returned to the land Thatch has a much greater insulating value than any other traditional roof covering With the right choice of material and detailing a well maintained thatched roof will keep a building warm in winter and cool in summer and has the added advantage of being highly sound proof The guidance stresses that changes to improve the energy performance of thatched roofs should only be attempted where really necessary as many thatched buildings already provide adequate thermal performance and where the traditional breathable performance of the building will not be compromised This guidance forms one of a series of thirteen guidance notes covering the thermal upgrading of building elements such as roofs walls and floors      Decon Thatch Jo Cox,John R. *Thatch* Dermot Nolan, 2015-05-01 [Thatch Roof Cooling](#) Benjamin Ramirez, AI, 2025-02-23 *Thatch Roof Cooling* examines the viability of thatch roofs as a sustainable eco friendly alternative for heat mitigation in building design. The book challenges the perception of thatch as merely a traditional material instead positioning it as a practical solution for contemporary energy conservation. It explores the thermal performance of thatch noting its low thermal conductivity and high thermal mass which historically provided comfortable indoor environments without reliance on mechanical cooling. The book systematically builds its argument by first introducing the fundamentals of heat transfer and the properties of thatch. It progresses through case studies of traditional structures delves into the science behind thatch's insulative capabilities using thermal imaging and heat flux measurements and explores modern adaptations addressing fire resistance and durability. It highlights the potential benefits of widespread thatch adoption including reduced carbon footprint and rural economic development framing thatch as a sustainable material relevant to architectural design and passive cooling.

**Our Homes and Gardens**, 1926 *Living Under Thatch* Barry O'Reilly, 2004 A celebration of traditional thatched houses [Building Surveys and Reports](#) James Douglas, 2010-12-13 This book provides guidance on building survey work for typical residential commercial and industrial buildings with advice on how to diagnose a wide range of defects. It considers both modern and older construction methods together with new and traditional materials. The particular problems of alteration and renovation work are discussed with guidance on how to carry out measured surveys. A separate chapter covers survey problems after flood and fire damage and the legal section takes account of recent developments in case law relating to inspections and surveys of properties. This new edition continues to provide a thorough treatment of all the key issues relating to surveying buildings dealing with the problems that surveyors are likely to encounter when inspecting buildings.
