Subcommittee on Criminal Justice,1990 **To Run a Constitution** John Anthony Rohr,1986 In this synthesis of political philosophy public administration and American history Rohr seeks to legitimize the administrative state in terms of constitutional principle He tries to show that the fourth or administrative branch of government is compatible with the plans of the framers both Federalist and anti Federalist of the U S Constitution and of the Bill of Rights He argues that the combination of powers in administrative agencies does not violate the standard of separation of powers set forth in The Federalist especially by James Madison the higher reaches of the career civil service fulfill the framers constitutional design by performing a balancing function originally assigned to the Senate and the career civil service en masse heals the defect of inadequate representation in the Federal Constitution ISBN 0 7006 0291 7 29 95

Experience of the Scottish Elections Great Britain. Parliament. House of Commons. Scottish Affairs Committee,2008 On 3 May 2007 combined elections were held in Scotland electing members to the Scottish Parliament and all 32 of Scotland s local councils The number of spoilt ballots cast in these elections was unusually high and difficulties with the electronic counting machines led to the count being suspended in some constituencies The Electoral Commission engaged Ron Gould CM to conduct an independent assessment of the elections This report examines the findings of the Gould Report and its recommendations some of which have already been accepted in principle by the Scotland Office and by the Scottish Executive including holding the Scottish Parliament and local government elections at different times and producing separate regional and constituency ballot papers for the Scottish Parliament elections Evidence strongly suggests that there are deep problems with the way elections are administered both in Scotland and across the UK which if left unaddressed could again create difficulties in the future Any changes to the way in which elections are carried out must be accompanied by rigorous research and testing the absence of such research and testing was a major failing that led to the problems of 3

May There were failings on the part of the Scotland Office where lengthy delays disrupted election planning and led to weak contingency arrangements The Electoral Commission did not do enough to warn of potential problems with the ballot The use of e counting has been subject to particular criticism Although electronic counting may have the potential to produce results more quickly in these elections it did not operate efficiently or transparently Any future proposals must place the needs of the voter and the interests of transparency far above the limitations of any given technology *Decadence* Jim Houghan,1975

Founding Republics in France and America John Anthony Rohr,1995 Recalling Tocqueville s exhortation for the French to look to America for a better understanding of their own government John Rohr returns the favor by revealing how much we can learn about American constitutionalism from a close study of French governance The French and American republics both emerged from the same revolutionary era and share a common commitment to separation of powers rule of law and republicanism Even so the two constitutional traditions are quite different France after all has replaced its constitution at least thirteen times since 1789 while the American constitution has endured essentially intact Yet as Rohr shows French constitutionalism merits our careful attention Focusing upon the founding of the French Fifth Republic and the drafting of its constitution Rohr compares the nations divergent approaches to executive legislative and judicial power independent administrative authority and discretion and the relation of administrative law to statutory law His analysis of France s divided versus our unified executive the two presidents exceptional powers and their influence on the legislative process provides particularly fresh insights into how the two constitutional traditions promote and inhibit the capacity for administrative action Rohr shows that French administrative institutions are much more thoroughly developed than their American counterparts due to recurrent presidential and constitutional crises Without such a strong public administration daily life in France would likely be extremely unstable if not quite chaotic The proper role of the French institutions he suggests is largely determined by their relationship to elected officials whereas their American counterparts are essentially shaped by the constitutional order A model for future comparative work in constitutional law and public administration Rohr s study should help us see that the constitutional path we ve pursued wasn t the only possibility and why we ve chosen that route nevertheless As such it should have great appeal for students teachers and practitioners in U S and French law politics and public administration *Final Report* California. Grand Jury (Orange County),1973 **The United Nations** Sam Daws,Paul Graham Taylor,Sara Lodge,2000 The International Library of Politics and Comparative Government is an essential reference series which compiles the most significant journal articles in comparative politics over the past 30 years It makes readily accessible to teachers researchers and students an extensive range of essays which together provide an indispensable basis for understanding both the established conceptual terrain and the new ground being broken in the rapidly changing field of comparative political analysis These two volumes include articles which examine the system the structure the function and the future of the United Nations **Still in Our Hands** Commission on California State Government
