Billboard **Skuas and Jaegers** Klaus Malling Olsen,2013-09-05 Skuas and jaegers are a fascinating and popular group of
seabirds that make up a subfamily of just seven species They can be divided into two main groups the larger species of
Catharacta skuas which are mainly found in the southern hemisphere with Great Skua breeding in the north and the three
Stercorarius species also known as jaegers which breed in the northern hemisphere Both northern and southern skuas breed
at high latitudes and several species are long distance migrants performing spectacular migrations through most of the world
s oceans sometimes even flying overland The individual plumage variation in some species is enormous creating one of the
most puzzling yet fascinating challenges in modern field identification This is the first complete identification guide to the
skuas of the world It is designed to enable species identification and correct ageing and the information presented is based
on years of study in the field detailed examination of photographs and museum skins and extensive research of the relevant
literature The comprehensive text is accompanied by twelve exquisite colour plates by Hans Larsson illustrating a wide range
of plumages In addition there are eight pages of colour photographs and numerous black and white photographs and
