Crisis and Promise in the Caribbean Winston Dookeran, 2016-03-09 The Caribbean is made up of a complex enigmatic region characterised by great disparities in size population geography history language religion race and politics This is a region in which harmony and discord work in tandem trying to link economic logic with political logic This book is a useful tool not only for those specialists and students of regionalism but for all those putting their hands to the task of nation building and those interested in the development processes of small states and economies At the same time this book is a comprehensive historical record especially highlighting hindrances to development in this region This study raises two important issues the political imperative of convergence and the need for appropriate correcting mechanisms that align the needs of the local with the regional It is a volume that underlines the need for a change in strategy and makes proposals as to how to go about making those changes

Developments and Challenges in the Caribbean Region Mr. Simon Cueva, Mr. Samuel P. Itam, Mr. Erik J.

Lundback, Ms. Janet Gale Stotsky, Mr. Stephen Tokarick, 2000-12-04 This paper focuses on the independent states that are full members of the Caribbean Community It provides background information on recent developments in the Caribbean region and lays out the principal policy issues that countries will need to address in the period ahead The Caribbean countries face several common problems and must deal with similar economic policy issues Consequently concentrating on the regional perspective permits a comparison of the individual responses to similar problems The regional view throws light on the countries movement toward convergence The economic prospects for the region are generally satisfactory over the medium term but the projections depend importantly on the resolve of governments to pursue appropriate policies as well as favorable developments in the rest of the world The relatively favorable outlook for the region is not without risks such as a slowdown in growth in the major trading partner countries or a term of trade shock **Nontimber Forest Products in the United States** Eric T. Jones, Rebecca Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America s forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of

NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
