Calligaro,2013-12-18 The book explores the promotion of Europeanness which aims to arouse feelings of belonging to the European Union It demonstrates that the promotion of Europeanness at the EU level does not constitute an overarching identity policy that imposes a homogenous interpretation of European identity Rather it is a process of negotiation in which various entrepreneurs of Europeanness within and outside the EU institutions invent and communicate representations of Europe Both the negotiation and the multilayered representations of Europe that it produces are investigated through three case studies the academia and the historians European heritage and the iconography of the

**Images of Europe** Francesco Mangiapane,Tiziana Migliore,2021-05-20 This book deals with the fundamental semantics of images of Europe which consist of valences mirror beliefs and affectivities This is why it relaunches the importance of the European discourse in its symbolic dimension As such it explores the many images of Europe or rather the many images through which European discourse is actually constituted in daily life in search of their enunciative responsibility in today's world for determining the current State of the Union The identity of the European continent is based on a millenary tension between universalism and particularism images of Europe have in fact been alternately inspired over the centuries by a model of homogeneity Roman and Carolingian imperial disposition on the one hand and by a model of fragmentation a Europe of city states municipalities regions and small fatherlands on the other In the European Union a political and economic organism this issue has recently been amplified to the point that it has reentered public debate and political parties that are only recognizable for being Europeanists or anti Europeanists are now ubiquitous In this regard one major bone of contention is how to portray the quintessential aspects of the European territory which are either interpreted as thresholds to be overcome in the name of a model of United Europe integral totality or are instead regarded as insurmountable obstacles for a Europe that is irreparably and perhaps according to anti Europeanists fortunately fragmented partitive totality Further this is to be done without excluding the possibility of contradictory and complementary solutions to these binary visions In this context the book analyzes various texts in order to obtain a more precise picture of the clash reveal its semiotic forms and by doing so identify a way out of the crisis **Official Report of Debates, House of Commons**

including through many funding and budgetary decisions This report attempts to quantify through budgetary analysis what shifts occurred in the external dimension of Europe s migration policy following the crisis and in three member states Germany Sweden and the Netherlands These short term shifts representing policy priorities carry long term consequences for the European Union s role as a foreign policy and soft power actor Official Report of the Debates of the House of Commons Canada.
