David J. Storey

The Decade Of Creation:

In the Beginning Michael Lienesch, 2007-04-23 The current controversy over teaching evolution in the public schools has grabbed front page headlines and topped news broadcasts all across the United States In the Beginning investigates the movement that has ignited debate in state legislatures and at school board meetings Reaching back to the origins of antievolutionism in the 1920s and continuing to the promotion of intelligent design today Michael Lienesch skillfully analyzes one of the most formidable political movements of the twentieth century Applying extensive original sources and social movement theory Lienesch begins with fundamentalism describing how early twentieth century fundamentalists worked to form a collective identity to develop their own institutions and to turn evolution from an idea into an issue He traces the emerging antievolution movement through the 1920s examining debates over Darwinism that took place on college campuses and in state legislatures throughout the country With fresh insights and analysis Lienesch retells the story of the 1925 Scopes monkey trial and reinterprets its meaning In tracking the movement from that time to today he explores the rise of creation science in the 1960s the alliance with the New Christian Right in the 1980s and the development of the theory of intelligent design in our own time He concludes by speculating on its place in the politics of the twenty first century In the Beginning is essential for understanding the past present and future debates over the teaching of evolution [Rise of the Robots](#) Martin Ford, 2015-05-05 The New York Times bestselling guide to how automation is changing the economy undermining work and reshaping our lives Winner of Best Business Book of the Year awards from the Financial Times and from Forbes Lucid comprehensive and unafraid an indispensable contribution to a long running argument Los Angeles Times What are the jobs of the future How many will there be And who will have them As technology continues to accelerate and machines begin taking care of themselves fewer people will be necessary Artificial intelligence is already well on its way to making good jobs obsolete many paralegals journalists office workers and even computer programmers are poised to be replaced by robots and smart software As progress continues blue and white collar jobs alike will evaporate squeezing working and middle class families ever further At the same time households are under assault from exploding costs especially from the two major industries education and health care that so far have not been transformed by information technology The result could well be massive unemployment and inequality as well as the implosion of the consumer economy itself The past solutions to technological disruption especially more training and education aren't going to work We must decide now whether the future will see broad based prosperity or catastrophic levels of inequality and economic insecurity Rise of the Robots is essential reading to understand what accelerating technology means for our economic prospects not to mention those of our children as well as for society as a whole [The Decades of Henry Bullinger, Minister of the Church of Zurich, Translated by H. I. Henry Bullinger](#), 2009-02-02 History The Parker Society For the Publication of the Works of the Fathers and Early Writers of the Reformed English Church was formed in 1840 and disbanded in 1855 when its work was completed

Its name is taken from that of Matthew Parker the first Elizabethan Archbishop of Canterbury who was known as a great collector and preserver of books The stimulus for the foundation of the society was provided by the nineteenth Century Tractarians Some members of this movement e g R H Froude in his *Remains* of 1838 9 spoke most disparagingly of the English Reformation Really I hate the Reformation and the Reformers more and more Keble could add in 1838 Anything which separates the present Church from the Reformers I should hail as a great good Protestants within the Church of England therefore felt the urgent need to make available in an attractive and accessible form the works of the leaders of the English Reformation To many it seemed that the Protestant foundations of the English Church were being challenged like never before Thus the society represented a co operation between traditional High Churchmen and evangelical churchmen both of whom were committed to the Reformation teaching on justification by faith Subscribers were also involved in the erection of the Martyrs Memorial in Oxford although this was as much anti Roman Catholic as anti Tractarian The society had about seven thousand subscribers who paid one pound each year from 1841 to 1855 thus for fifteen pounds the subscribers received fifty three volumes the General Index and the Latin originals of the 1847 Original Letters relative to the English Reformation being special subscriptions Twenty four editors were used and the task of arriving at the best text was far from easy The choice of publications was controversial and some authors and works were unfortunate not to be included in PS volumes While some of the volumes have been superseded by more recent critical editions today this collection remains one of the most valuable sources for the study of the English Reformation

The Naos of the Decades Anne-Sophie von Bomhard, 2008 This monograph presents the almost completely reconstituted Naos of the Decades with an excellent set of photographic images The four additional fragments recovered in East Canopus during the excavations of the European Institute of Underwater Archaeology are examined with the two original fragments from the Louvre and Greco Roman Museum Egypt The largest of the new fragments consists of a cosmogony of over 20 columns with no known parallel disproving the order of the decades as it was initially assumed and suggesting a far older tradition of Egyptian astrology Price approx

Understanding The Small Business Sector David J. Storey, 2016-07-22 Originally published in 1994 this text analyses the key issues that influence the growth and development of small businesses Looking at the concept in

which they operate the book outlines the factors that are dominant in the sector and explores the effects it has on the economy. Is the creation of small businesses the answer to unemployment? Has the lowering of interest rates or taxation encouraged the self-employed to work harder? Have banks given small business a raw deal? These are just some of the questions discussed as David Storey explains the issues of employment, finance and policy, and the issues dictating failure or success.
