Psychogenic Nonepileptic Seizures Barbara A. Dworetzky, Gaston Baslet, 2017 Psychogenic nonepileptic seizures PNES are attacks that mimic epileptic seizures but are not caused by abnormal electrical discharges in the brain Instead PNES are typically considered involuntary expressions of distress making diagnosis and treatment a challenge Historically patients are referred to neurologists who after completing a diagnostic work up refer patients to mental health professionals including psychiatrists for treatment For a number of reasons this transition of care between specialists is often not successful and this impacts patient treatment and outcomes *Psychogenic Nonepileptic Seizures Toward the Integration of Care* offers new insights into the practical diagnostic and treatment challenges faced by clinicians who manage this condition This book covers the different stages of care from the initial evaluation to long term outcomes and highlights the need to work collaboratively to provide patients with comprehensive care and improved outcomes It provides up to date evidence and shares clinical expertise for the management of this challenging diagnosis that requires the expertise of a multi disciplinary team The authors provide a new framework on how to conceptualize and manage this disorder to more effectively address the needs of patients
