- Is the garden net positive?

natural health benefits of being surrounded by nature. They also include the provision of cover, shelter, roosting and nesting spaces that plants may provide, which benefit nature, which in turn benefits people. Other ecosystem services could include the provision of food for both humans and wildlife, or the provision of shade, the filtering of air and noise reduction.

A four-stage process is often used to evaluate the provision of ecosystem services:

1. A definition of aims and the scope of the project or design.

Rosehips add interest and colour to late summer gardens.

Rosehips also provide a useful food source for garden birds.

2. The identification and prioritisation of ecosystem services in the design process. This includes decisions such as which services are most important — regionally, nationally or to the client.
