In recent years a number of classical scholars have turned their attention to prostitution in the ancient world Close examination of the social and legal position of Roman meretrices and Greek hetairai have enriched our understanding of ancient sexual relationships and the status of women in these societies These studies have focused however almost exclusively on the legal and literary evidence McGinn approaches the issues from a new direction by studying the physical venues that existed for the sale of sex in the context of the Roman economy Combining textual and material evidence he provides a detailed study of Roman brothels and other venues of venal sex from imperial palaces and private houses to taverns circuses and back alleys focusing on their forms functions and urban locations The book covers the central period of Roman history roughly from 200 B C to A D 250 It will especially interest social and legal historians of the ancient world and students of gender sexuality and the family Thomas A J McGinn is Associate Professor of Classical Studies at Vanderbilt University      **The Earliest Christian Meeting Places** Edward Adams,2013-10-24  
Edward Adams challenges a strong consensus in New Testament and Early Christian studies that the early Christians met almost exclusively in houses This assumption has been foundational for research on the social formation of the early churches the origins and early development of church architecture and early Christian worship Recent years have witnessed increased scholarly interest in the early house church Adams re examines the New Testament and other literary data as well as archaeological and comparative evidence showing that explicit evidence for assembling in houses is not nearly as extensive as is usually thought He also shows that there is literary and archaeological evidence for meeting in non house settings Adams makes the case that during the first two centuries the alleged period of the house church it is plausible to imagine the early Christians gathering in a range of venues rather than almost entirely in private houses His thesis has wide ranging implications
