The Worlds Railroads:

The World the Railways Made Nicholas Faith,2014-09-25 Across American prairies through Siberian tundra over Argentinian pampas and deep into the heart of Africa the modern world began with the arrival of the railway The shock was sudden and universal railways carried empire capitalism and industrialization to every corner of the planet For some the Iron Road symbolized the brute horrors of modernity for others the way toward a brighter future From 1825 when the first passenger service linked Stockton and Darlington to the outbreak of World War I Nicholas Faith presents an engaging and entertaining journey through the first century of rail introducing visionaries engineers surveyors speculators financiers and navvies the heroes and the rogues of the mechanical revolution that turned the world upside down The railway was the most important invention of the 19th Century and **THE WORLD THE RAILWAYS MADE** argues that in the 21st Century with high speed lines that can compete with air travel and over 190 metro systems in 54 countries underpinning the world s greatest cities it remains just as relevant *The World's Railroads* Christopher Chant,2000 Although the origins of the train concept are to be found in the Middle Ages and the use of steam power for locomotives emerged in the Industrial Revolution of the 18th century the train really came of age in the Victorian era of the 19th century At this time there was an explosion of technical ideas and this combined with greater national wealth and a rapidly changing social and economic climate to spur a railway boom Railroad lines spread over every part of the world where there was a social and economic advantage to be gained and there was an extraordinarily rapid development in the speed and capacity of trains operating on these lines
