SAP® ABAP™ Handbook Kogent Learning Solutions Inc., 2009-10-15 *The Art of Image Processing with Java* Kenny A. Hunt, 2016-04-19 This introductory image processing text is ideal for college students studying computer science or software engineering With an emphasis on software design the text builds on an accessible mathematical foundation and on extensive sample Java code to teach students the fundamentals of image processing The text is accompanied by rich illustrations that demonstrate the results of performing processing on famous art pieces This approach gives readers real world examples of ways they may use image processing Each chapter includes problems for students and an online supplement offers instructor resources **Story as History - History as Story** Samuel Byrskog, 2022-03-16 Please note that this title is only available to customers in the USA Canada and Mexico NO salesrights for Rest of World Samuel Byrskog employs models from the interdisciplinary field of oral history as presented by Paul Thompson coupled with insights from cultural anthropology in order to examine the interaction between the present and the past as the gospel tradition evolved The ancient Greek and Roman historians with their use of eyewitness testimony as sources to the past and as central elements in interpretive and narrativizing processes of the present serve as the basis for unraveling culture specific patterns of oral history and thus for conceptualizing similar aspects during the development of the gospel tradition Eyewitness testimonies played a central but varying role in early Christianity They were transmitted in the matrix of discipleship where verbal and behavioral traditions were passed on through acts of mimesis The folkloristic notion of re-oralization explains how oral accounts regularly interacted with written texts indicating a vivid and engaged relationship to the past as well as the

semantic significance of oral communication and performance Factual truth was essential but inseparable from interpreted truth during the course of investigation transmission and composition The gospel tradition developed through a subtle interaction between the unique historic events of the past and the various circumstances of the present The narrative and historical dimensions of a text cannot be separated because the semantic codes of a text are often located in the culture and not in the text itself The gospels are therefore the synthesis of history and story intertwining the horizons of the past and of the present in their own right
