## To Lead The Free World:

**To Lead the Free World** John Fousek, 2003-06-20 In this cultural history of the origins of the Cold War John Fousek argues boldly that American nationalism provided the ideological glue for the broad public consensus that supported U S foreign policy in the Cold War era From the late 1940s through the late 1980s the United States waged cold war against the Soviet Union not primarily in the name of capitalism or Western civilization neither of which would have united the American people behind the cause but in the name of America Through close readings of sources that range from presidential speeches and popular magazines to labor union debates and the African American press Fousek shows how traditional nationalist ideas about national greatness providential mission and manifest destiny influenced postwar public culture and shaped U S foreign policy discourse during the crucial period from the end of World War II to the beginning of the Korean War Ultimately he says in the atmosphere created by apparently unceasing international crises Americans rallied around the flag eventually coming to equate national loyalty with global anticommunism and an interventionist foreign policy Year, 1951 World Congress on Medical Physics and Biomedical Engineering September 7 - 12, 2009 Munich, Germany Olaf Dössel, Wolfgang C. Schlegel, 2010-01-01 Present Your Research to the World The World Congress 2009 on Medical Physics and Biomedical Engineering the triennial scientific meeting of the IUPESM is the world s leading forum for presenting the results of current scientific work in health related physics and technologies to an international audience With more than 2 800 presentations it will be the biggest conference in the fields of Medical Physics and Biomedical Engineering in 2009 Medical physics biomedical engineering and bioengineering have been driving forces of innovation and progress in medicine and healthcare over the past two decades As new key technologies arise with significant potential to open new options in diagnostics and therapeutics it is a multidisciplinary task to evaluate their benefit for medicine and healthcare with respect to the quality of performance and therapeutic output Covering key aspects such as information and communication technologies micro and nanosystems optics and biotechnology the congress will serve as an inter and multidisciplinary platform that brings together people from basic research R D industry and medical application to discuss these issues As a major event for science medicine and technology the congress provides a comprehensive overview and in depth first hand information on new developments advanced technologies and current and future applications With this Final Program we would like to give you an overview of the dimension of the congress and invite you to join us in Munich Olaf D ssel Congress President Wolfgang C
