Discoursing the Post-secular Péter Losonczi, Aakash Singh, 2010 This collection of fresh and lively essays analyzes the Habermasian post secular turn as it has been evolving over the last decade triggering intensive debates in social and political theory but at the same time aims to situate the arising postsecular discourses within the larger intellectual environment shaped by the complex influence of the alleged return of religion or the religious The volume includes studies from as diverse fields as cultural theory social theory political philosophy and theory of religion as well as theology and bioethics Key issues such as tolerance the nature and challenges of modernity pluralism knowledge and faith human dignity ritual idolatry or transcendence are brought into the discussion in an inventive way and Habermas's work is reflected upon in comparison with figures like Levinas Vattimo and Agnes Heller

Karl Popper and Africa: Knowledge, Politics and Development Oseni Taiwo Afisi, 2021-09-13 This book provides a diverse contextualization of Popper's critical rationalism concerning knowledge and his generalized attitude of criticism on appropriate social and political reforms in contemporary Africa The book evaluates how best to address contemporary political problems especially in politically very troubled parts of the world To address these contemporary problems especially as it relates to Africa the authors found the political philosophy of Popper as suitable The discussion of Popper's political philosophy engages us directly with all the particularities of socio economic and political problems within contemporary Africa In other words it presents the truth of the present socio political reality in Africa where the question of what kinds of political ideas and concepts can be offered as appropriate to a political environment which so greatly faces facets of developmental issues Although the issues and events that informed the writings of Popper's *The Poverty of Historicism* as well as *The Open Society and Its Enemies* were among others the rise of fascism and communism in Europe the inventiveness of this work is how happily scholars in non liberal societies such as in Africa can pick up Popper's insights and usefully work with them to offer appropriate social reforms for their society This volume is a critical juxtaposition of Popper's ideas in a bid to make good sense of social and intellectual conditions in Africa particularly as it relates to the scale and speed of social change that is needed in most African nations that are often ridden by corruption The book is suitable for studies in political philosophy economic and development studies African Studies and Indigenous Knowledge systems

Americans enjoy the most benevolent political system that has ever emerged in the course of human history Unprecedented prosperity health liberty and stability give rise to the envy of the rest of the world However these privileges cannot defend themselves The Art of Politics necessitates that we balance the conflicting claims of these and other political goods in the midst of ever changing circumstances and external and internal threats Reason pluralism necessary limits liberty toleration justice the right to private property democracy authority and civility are the goods The enemies are the ideologues who scorn this system because it falls short of a never realized theoretical ideal they have borrowed from their European brethren This effort by the ideologues to change our systems radically is ultimately the betrayal of American politics and one of the most serious threats we face This book tells us how to defend ourselves against these threats and how to practice this most valuable art the Art of Politics
