Morgan,Marcus D. Ingle,Craig W.

Shinn, 2018-09-03 Most leadership literature stems from and focuses on the private sector emphasizing personal qualities that bind leaders and followers to a shared purpose. As the authors of *New Public Leadership* argue, if these shared purposes do not build trust and legitimacy in public institutions, such traditional leadership tropes fall short of the standard demanded by contemporary public servants. For twenty years, the authors have been developing a leadership education and training framework specifically designed to encourage public service professionals to lead from where they sit. This book presents that comprehensive, integrated, and practical leadership framework grounded in the uniqueness of public legal missions, culture, history, and values. The authors explore three key elements of leadership success: 1) an understanding of our public service context, including the history, the values, and the institutions that comprise our leadership setting; 2) a set of tools designed to help leaders initiate collective action in wicked challenge settings; and 3) tools to support sound judgment, enabling leaders to do the right thing in the right circumstances for the right reasons. The authors further provide readers with a basic understanding of democratic institutions, encouraging them to work within and across multiple vertical and horizontal systems of authority. The book is organized into four sections, each of which is accompanied by a Master Case that provides the reader with an opportunity to apply the principles and leadership tools discussed in the text to practice. To further reinforce the practice-centered approach to leadership knowledge and skills, the authors have developed an accompanying *EMERGE Leadership Handbook*, complete with exercises available online. Written specifically with the practicing public manager in mind, this book arms public servants with a large repertoire of leadership skills designed to accommodate changing public values and conflicting priorities at all levels of our public organizations. *The Leader in Me* Stephen R. Covey, 2008-11-18 The world has entered an era of the most profound and challenging change in human history. Most of our children are not prepared, and we know it. Parents around the world see the change and know that the traditional three R's—reading, writing, and arithmetic—are necessary but not enough. Their children need to become far more responsible, creative, and tolerant of differences. They need to increase their ability to think for themselves, take initiative, get along with others, and solve problems. Business leaders are not finding people whose skills and character match the demands of today's global economy, including strong communication, teamwork, analytical, technology, and organizational skills. They need young people who are self-motivated, creative, and have a strong work ethic. How will we bridge this ever-widening gap? *The Leader in Me* is the story of the extraordinary schools, parents, and business leaders around the world who are preparing the next generation to meet the great challenges and opportunities of the twenty-first century. In 1999, the A. B. Combs Elementary School in North Carolina was on the verge of being cut as a magnet school and needed to find new ways to educate its students. Teachers and administrators began teaching practical, principle-based leadership skills with remarkable results. In a short time, the number of students passing end-of-grade tests vaulted from 84 to 97 percent. Simultaneously, the school began reporting significant increases in students' self-confidence, dramatic drops in discipline problems, and striking increases in teacher and

administrator job satisfaction Parents meanwhile reported equivalent improvements in their children s attitudes and behavior at home As news of the school s success spread schools around the world began adopting the mantra to develop leaders one child at a time Business and civic leaders started partnering with schools in their communities to sponsor teacher training and student resources Each school and family approached the principles differently but the results were the same attentive energized young people engaging in the world around them The best way to prepare the next generation for the future is to emphasize the value of communication cooperation initiative and unique individual talent for nothing undermines confidence more than comparison Whether in the classroom or at home it is never too early to start applying leadership skills to everyday life Drawing on the many techniques and examples that have already seen incredible success around the world The Leader in Me shows how easy it is to incorporate these skills into daily life It is a timely answer to many of the challenges facing today s young people businesses parents and educators one that is perfectly matched to the global demands of the twenty first century
