Gradus, Harvey Lithwick, 1996 In fifteen insightful new essays noted scholars in geography economics and public policy provide a comparative examination of the problems and prospects for development in frontier areas Blending theory with case studies the essays challenge the widely held notion that peripheral areas are marginal or backward *Tourism, Tourists and Society* Richard Sharpley, 2018-05-01 *Tourism Tourists and Society* provides a broad introduction to the inter relationship between tourism and society making complex sociological concepts and themes accessible to readers from a non sociological academic background It provides a thorough exploration of how society influences or shapes the behaviours motivations attitudes and consumption of tourists as well as the tourism impacts on destination societies The fifth edition has been fully revised and updated to reflect recent data concepts and academic debates New content on mobilities paradigm and the emotional dimension of tourist experiences New chapter *Tourism and the Digital Revolution* looking at the ways in which the Internet and mobile technology transform both tourist behaviour and the tourist experience New end of chapter further reading and discussion topics Accessible yet critical in style this book offers students an invaluable introduction to tourism tourists and society **Strategies for Tourism Industry** Murat Kasimoglu, 2012-04-20 Today it is considered good business practice for tourism industries to support their micro and macro environment by means of strategic perspectives This is necessary because we cannot contemplate companies existing without their environment If companies do not involve themselves in such undertakings they are in danger of isolating themselves from the shareholder That in turn creates a problem for mobilizing new ideas and receiving feedback from their environment In this respect the contributions of academics from international level together with the private sector and business managers are eagerly awaited on topics and sub topics within *Strategies for Tourism Industry Micro and Macro Perspectives* *Tourism and Degrowth* Robert Fletcher, Ivan Murray Mas, Asunción Blanco Romero, Macià Blázquez-Salom, 2020-06-29 *Tourism and Degrowth* develops a conceptual framework and research agenda for exploring the relationship between tourism and degrowth Rapid and uneven expansion of tourism as a response to the 2008 economic crisis has proceeded in parallel with the rise of social discontent concerning so called overtourism Meanwhile despite decades of concerted global effort to achieve sustainable development

socioecological conflicts and inequality have rarely reversed but in fact increased in many places Degrowth understood as both social theory and social movement has emerged within the context of this global crisis However thus far the vibrant degrowth discussion has yet to engage systematically with the tourism industry in particular while by the same token tourism research has largely neglected explicit discussion of degrowth This volume brings the two discussions together to interrogate their complementarity Identifying a growth imperative in the basic structure of the capitalist economy the contributors contend that mounting critique of overtourism can be understood as a structural response to the ravages of capitalist development more broadly Debate concerning overtourism thus offers a valuable opportunity to re politicise discussion of tourism development generally Exploring of the potential for degrowth to facilitate a truly sustainable tourism Tourism and Degrowth will be of great interest to scholars of tourism environmental sustainability and development The chapters were originally published as a special issue of the Journal of Sustainable Tourism
