Toxic Politics Responding To Chemical Disasters:

Toxic Politics Michael Reich, 1991 **Toxic Politics** Michael R. Reich, 1991 **Working Disasters** Eric Tucker, 2016-12-05 Every day workers are injured made ill or killed on the job Most often workers experience these harms individually and in isolation Particular occurrences rarely attract much public attention beyond perhaps a small paragraph in the local newspaper Instead these events are normalized This membrane of normalcy however is ruptured from time to time especially after a disaster This edited collection draws together original case studies written by leading researchers in Australia Canada Great Britain Sweden and the United States that examine the politics of working disasters The essays address two fundamental questions what gets recognized as a work disaster And how does the state respond to one In some instances it seems self evident that a disaster has occurred For example when a mine explodes killing tens or hundreds of workers simultaneously the media and politicians recognize that this is not just a personal tragedy for the families of the victims and that more troubling questions need to be asked about how this could happen In other circumstances however the process that determines what gets recognized as a disaster is much more complicated *Working Disasters* addresses the politics of recognition in case studies of the long haul trucking industry repetitive strain injuries and lung disease in miners Once it has recognized that a working disaster has occurred the state typically goes beyond its routine responses to the daily toll of work related deaths and injuries Inquiries may be initiated to review the adequacy of regulatory systems and laws may be amended Sometimes disasters produce meaningful change but often they do not In this text the politics of response is considered in studies of a factory fire the loss of an offshore oilrig lung disease among miners a mine explosion and the prosecution of health and safety offences This book will be of use to occupational health and safety activists and professionals academics and upper year students in industrial relations labour studies labour history law political science and sociology

Learning from Disaster Sheila Jasanoff, 2016-11-11 Selected by *Choice* magazine as an Outstanding Academic Title The 1984 lethal gas leak at the Union Carbide pesticide plant in Bhopal India may be the most extensively studied industrial disaster in history In a departure from earlier studies that have focused primarily on the causes of the catastrophe Sheila Jasanoff and the contributors to this volume critically examine the consequences of the accident [Hazardous Wastes, Industrial Disasters, and Environmental Health Risks](#) Francis O. Adeola, 2011-10-24 The sociology of hazardous waste risk and disasters is a relatively new discipline This book focuses on hazardous and toxic wastes releases industrial toxic disasters contamination of communities and the environment and the subsequent adverse health effects among exposed populations

Politics and the Life Sciences, 1993 [This Borrowed Earth](#) Robert Emmet Hernan, 2010-02-02 Over the last century mankind has irrevocably damaged the environment through the unscrupulous greed of big business and our own willful ignorance Here are the strikingly poignant accounts of disasters whose names live in infamy Chernobyl Bhopal Exxon Valdez Three Mile Island Love Canal Minamata and others And with these the extraordinary and inspirational stories of the

countless men and women who fought bravely to protect the communities and environments at risk The Angry Earth Anthony Oliver-Smith, Susanna Hoffman, Susanna M. Hoffman, 2019-12-06 The Angry Earth explores how various cultures in different historical moments have responded to calamity offering insight into the complex relationship between societies and their environments From hurricanes floods and earthquakes to oil spills and nuclear accidents disasters triggered by both natural and technological hazards have become increasingly frequent and destructive across the planet Through case studies drawn from around the globe the contributors to this volume examine issues ranging from the social and political factors that set the stage for disaster to the cultural processes experienced by survivors to the long term impact of disasters on culture and society In the second edition each chapter has been updated with a postscript to reflect on recent developments in the field There is also new material on key present day topics including epidemics drought non governmental organizations and displacement and resettlement This book demonstrates the relevance of studying disaster from an anthropological perspective and is a valuable resource not only for anthropologists but for other fields concerned with education policy and practice Cultural Strategies of Agenda Denial Roger W. Cobb, Marc Howard Ross, 1997 This is the first book devoted to examining why some issues proposed by aggrieved individuals or groups are denied access to policy agendas The book contains case studies that look at the policy process from the perspective of the strategies opponents often use to ensure agenda denial strategies usually motivated by perceived threats to widely held world views and identities

Environmental Health Perspectives, 2003 *Toxic Politics* Michael Reich, 1981 Community Power, Bureaucracy, and Environmental Politics in New York City Robert A. Rodriguez, 1999 Three models elite rational pluralist incrementalist and non decision making political are used to test several hypotheses related to community power and bureaucratic decision making The hypotheses raise fundamental questions about the nature of political power and the workings of public bureaucracies in respect to the siting process *Toxic Politics* Michael Reich, 1982 Journal of Health Politics, Policy and Law, 1993 **Environmental Communication and the Public Sphere** Robert Cox, 2006-01-13 this is an excellent introduction to an important topic Media International Australia Environmental Communication and the Public Sphere is the first comprehensive undergraduate textbook in the growing field of environmental communication It takes as its theme the role of communication in influencing the ways in which we perceive the environment as well as what actions we and others take in our relations to the natural world The text blends scholarship and hands on experiences to provide a theory based and coherent description of the concrete communication practices and sites in the debates over environment protection The level of presentation targets upper level undergraduate students in speech communication environmental studies English journalism political science and sociology Additional theory and vocabulary are introduced as are case studies and examples for closer examination of the principal sites and practices of environmental communication including forums for public participation advocacy campaigns media coverage of environmental stories risk communication and models of dispute

settlement Key Features Provides a core text broad and theoretically coherent coverage that covers all of the basic areas of environmental communication Draws on the author s experiences as president of the largest U S environmental group Summarizes current scholarship in the area and makes accessible many of the practices of media corporations and advocacy groups that are not readily available in public sources Gives students insight into the practical ways to participate publicly in influencing the decisions of governmental agencies that affect the environment Offers a comprehensible treatment of the complexity and range of issues sites and practices in environmental communication Act Locally exercises provide opportunities for students to apply their knowledge of the principles of environmental communication on their campus or community
