Trace Metal Removal from Aqueous Solution R. Thompson, 1986 Trace Metal Removal from Aqueous Solution Ed Thompson, 1986 Increasing industrialisation brings with it the twin problems of more thorough removal of unwanted and possibly toxic metals from chemical and nuclear process effluent and the need to obtain some metals from progressively leaner initial sources or dilute recycle liquor parag Traditional methods such as precipitation by liming cementation or electrodeposition become less effective as metal ion concentrations fall to the low parts per million range and large volumes of liquor need to be handled parag Alternative methods based on biological systems with the complexation abilities of large molecules the use of novel membranes and selective precipitants which overcome previous solubility product barriers are constantly under development Eleven papers are reproduced here together with a subsequently contributed item of carbon adsorption techniques for gold recovery **Trace Metal Removal from Aqueous Solution** Raymond Thompson, Royal Society of Chemistry (Great Britain).
