Here's an overview of philosophical approaches to objectivity and truth in history, focusing on the positivist, relativist, postmodernist, and critical realism perspectives:

## 4.1. Positivist Approach

The positivist approach to historiography posits that history can be studied with the same objectivity and scientific rigor as the natural sciences. Positivists believe that historians should rely on empirical evidence, such as documents, artifacts, and statistical data, to construct factual narratives about the past. They emphasize the importance of observable phenomena and seek to establish general laws or patterns in historical development, akin to scientific laws. This perspective promotes the idea that objective truths about historical events can be uncovered through careful research and analysis, asserting that biases can be minimized through rigorous methodology.

## 4.2. Relativist Approach

The relativist approach challenges the notion of objective truth, arguing that truth is relative and heavily dependent on the historian's perspective, cultural context, and interpretive framework. Relativists assert that each historian brings their own biases, values, and experiences to their work, which inevitably shapes how they understand and narrate history. This perspective highlights the subjective nature of historical interpretation, suggesting that there is no single, definitive account of the past. Instead, multiple narratives coexist, each reflecting different viewpoints and interpretations, and each can be valid within its context.

## 4.3. Postmodernist View

Lynch,1998-12-01 A Choice Outstanding Academic Title for 1999 Academic debates about

pluralism and truth have become increasingly polarized in recent years. One side embraces extreme relativism, deeming any talk of objective truth as philosophically naive. The opposition frequently arguing that any sort of relativism leads to nihilism insists on an objective notion of truth according to which there is only one true story of the world. Both sides agree that there is no middle path. In *Truth in Context*, Michael Lynch argues that there is a middle path, one where metaphysical pluralism is consistent with a robust realism about truth. Drawing on the work of Hilary Putnam, W. V. O. Quine, and Ludwig Wittgenstein, among others, Lynch develops an original version of metaphysical pluralism which he calls relativistic Kantianism. He argues that one can take facts and propositions as relative without implying that our ordinary concept of truth is a relative epistemic or soft concept. The truths may be relative but our concept of truth need not be.
