Transferability of the Japanese Lean Management Approach from Production into the Office Madeline Gremme, 2015-05-12 Bachelor Thesis from the year 2015 in the subject Business economics Business Management Corporate Governance grade 1 3 University of applied sciences Dortmund course International Management language English abstract After the propitious end of the year 2013 economy started a slow recovery with signs of a cyclical upturn at the beginning of 2014 The construction sector consumer industries and company service providers were in good shape while capital goods producers have almost returned to their former strength Other important international trading companies started to intensify their growth little by little Globalization continued its progress since the economic crisis weakened multinational corporations from Europe the USA and Japan only barely At the same time companies in the West were increasingly

challenged by global competition Fast acting contractors found new clients and strategic trading partners while the latter however were facing strong and aggressive competition International competition continues to remain one of the key issues that companies have to deal with today Productivity and efficiency have to be improved steadily and innovation research and development initiatives are to be constantly promoted In order to address this issue successfully numerous companies make investment into the education and training of their personnel a priority Employees are called upon to recognize the potential for improvement at their workplace and to propose creative solutions The concept of Lean Management formerly mostly applied at Japanese companies is presently a reference term for lean processes and continuous competitiveness building In scholarly literature Lean Administration or Lean Office is described as the application of Lean Management approaches and methods to the field of business processes without regard to whether they take place on the shop floor or on higher administrative levels In the present thesis the applicability of this management approach will be not only analyzed but also submitted to critically scrutiny Is the term Lean only expressive of a misplaced downsizing fervor as critics claim or are the successes of Lean Management transferable into the sphere of administration as well Is it thus possible to achieve a lean administration Can processes often described as nontransparent and non measurable indeed be optimized through the application of this new management approach
