Values Teaching Sixteen Basic Val:

Getting value for money from the education of 16- to 18-year-olds Great Britain: National Audit Office,2011-03-23
Increases in expenditure on education for 16 to 18 year olds which now stands at 6 billion per year have been matched by improvements in students achievements and increasing participation of 16 to 18 year olds in education Nevertheless the National Audit Office cannot conclude that value for money is being delivered across the system because of variation in the arrangements for accountability performance monitoring and intervention where poor performance exists Students achieve on average better academic progress and results in institutions educating large numbers of 16 to 18 year olds whether colleges or school sixth forms Sixth form colleges perform best on most measures of student achievement despite currently receiving 280 per student less funding than school sixth forms The Department for Education has taken steps to reduce inconsistency in how different provider types are funded and has committed to bringing the funding levels for school sixth forms into line with colleges by 2015 Although there are clear arrangements for dealing with poor performance in colleges there is no consistent approach to dealing with poor performance in school sixth forms In addition the inspection frameworks and performance and financial reporting requirements for the various types of provider are not consistent Many schools and colleges have improved their management of back office costs through good practice in procurement However direct costs including teaching staff account for over 60 per cent of a provider s costs and some providers have a poor understanding of how to manage these costs
