**Varieties of Environmentalism** Ramachandra Guha, Joan Martínez Alier, 2013-10-11 Until very recently studies of the environmental movement have been heavily biased towards the North Atlantic worlds There was a common assumption amongst historians and sociologists that concerns over such issues as conservation or biodiversity were the exclusive preserve of the affluent westerner the ultimate luxury of the consumer society Citizens of the world s poorest countries ran the conventional wisdom had nothing to gain from environmental concerns they were too poor to be green and were attending to the more urgent business of survival Yet strong environmental movements have sprung up over recent decades in some of the poorest countries in Asia and Latin America albeit with origins and forms of expression quite distinct from their western counterparts In *Varieties of Environmentalism* Guha and Matinez Alier seek to articulate the values and orientation of the environmentalism of the poor and to explore the conflicting priorities of South and North that were so dramatically highlighted at the Rio Earth Summit in 1992 Essays on the ecology of affluence are also included placing in context such uniquely western phenomena as the cult of wilderness and the environmental justice movement Using a combination of archival and field data The book presents analyses of environmental conflicts and ideologies in four continents North and South America Asia and Europe The authors present the nature and history of environmental movements in quite a new light one which clarifies the issues and the processes behind them They also provide reappraisals for three seminal figures Gandhi Georgescu Roegen and Mumford whose legacy may yet contribute to a greater cross cultural understanding within the environmental movements *Varieties Of Environmentalism: Essays North And South* Ramachandra Guha, Joan Martinez-Alier, 1997 **Varieties of Environmentalism** Ramachandra Guha, Juan Martínez Alier, 2000 An attempt to highlight the values and orientation of the environmentalism of the poor and explore conflicting priorities of the rich and poor nations [Biodiversity Litigation](#) Guillaume Futhazar, Sandrine Maljean-Dubois, Jona Razzaque, 2022-11-17 Biodiversity is in accelerated decline and urgent action is needed In 2020 the Strategic Plan for Biodiversity ended and none of its Aichi Targets were met Despite the legally disappointing situation on a global level the role of national courts in adjudicating climate change litigation is showing potential for effective mitigation and adaptation and judges have become key actors in linking internationally agreed goals with tangible national commitments to mitigate climate change Can this pursuit of globally agreed goals at a local level be transposed and lead a similar trend for biodiversity governance This edited collection gives readers an overview of the shape and reach of biodiversity litigation drawing on specific case studies from countries such as Brazil China India and Canada It considers two questions Firstly what is the influence of international biodiversity law on biodiversity litigation Secondly what are the trends of biodiversity litigation Leading experts discuss these questions from the perspective of developing developed and mega bio diverse countries promoting the concept of biodiversity litigation as a common notion of environmental law and arguing for more
