## Varieties Of Cultural History:

*Varieties of Cultural History* Peter Burke,1997 In this collection of essays of which four are published here for the first time Peter Burke explores the theory and practice of what is called new cultural history He focuses on the varieties of cultural history which have emerged since the writings of Jacob Burckhardt and Johan Huizinga No new orthodoxy has emerged to replace the classic model Burke suggests despite the importance of innovative approaches inspired by social and cultural anthropology After discussing the origins and identity of cultural history Burke explores the social history of dreams and the relation between history and social memory He presents five case studies addressing topics in the history of early modern Italy Each is located on the frontiers of cultural history between learned and popular culture between the public and the private spheres and between the serious and the comic Burke then turns to the encounter between Europe and the New World and to the phenomenon of cultural translation in the etymological literal and metaphorical senses of the term He concludes with two theoretical investigations one on the history of mentalities and one which asks why cultural history seems doomed to fragmentation

**What is Cultural History?** Peter Burke,2013-04-26 What is Cultural History has established itself as an essential guide to what cultural historians do and how they do it Now fully updated in its second edition leading historian Peter Burke offers afresh his accessible guide to the past present and future of cultural history as it has been practised not only in the English speaking world but also in Continental Europe Asia South America and elsewhere Burke begins by providing a discussion of the classic phase of cultural history associated with Jacob Burckhardt and Johan Huizinga and of the Marxist reaction from Frederick Antal to Edward Thompson He then charts the rise of cultural history in more recent times concentrating on the work of the last generation often described as the New Cultural History He places cultural history in its own cultural context noting links between new approaches to historical thought and writing and the rise of feminism postcolonial studies and an everyday discourse in which the idea of culture plays an increasingly important part The new edition also surveys the very latest developments in the field and considers the directions cultural history may be taking in the twenty first century The second edition of What is Cultural History will continue to be an essential textbook for all students of history as well as those taking courses in cultural anthropological and literary studies

*Anthropologists, Sounding Primitives* A. Elisabeth Reichel, 2021-08 Writing Anthropologists Sounding Primitives re-examines the poetry and scholarship of three of the foremost figures in the twentieth century history of U.S. American anthropology: Edward Sapir, Margaret Mead, and Ruth Benedict. While they are widely renowned for their contributions to the early twentieth-century school of cultural relativism, what is far less known is their shared interest in probing the representational potential of different media and forms of writing. This dimension of their work is manifest in Sapir's critical writing on music and literature and Mead's groundbreaking work with photography and film. Sapir, Mead, and Benedict together also wrote more than one thousand poems, which in turn negotiate their own media status and rivalry with other forms of representation. A. Elisabeth Reichel presents the first sustained study of the published and unpublished poetry of Sapir, Mead, and Benedict, charting this largely unexplored body of work and relevant selections of the writers' scholarship. In addition to its expansion of early twentieth-century literary canons, *Writing Anthropologists Sounding Primitives* contributes to current debates about the relations between different media sign systems and modes of sense perception in literature and other media. Reichel offers a unique contribution to the history of anthropology by synthesizing and applying insights from the history of writing, sound studies, and intermediality studies to poetry and scholarship produced by noted early twentieth-century U.S. American cultural anthropologists.
