*Religion and Voluntary Organisations in Crisis* Stephen Yeo, 2022-05-29 First published in 1976 *Religion and Voluntary Organisations in Crisis* analyses the experience of late nineteenth and early twentieth century organised religion by setting it in the context of the whole range of voluntary and other organisations It provides a detailed study of churches and chapels in Reading set alongside the experience of a biscuit factory football club the hospital the university the WEA branch the Social Democratic Federation the Coop and the other organisations The interweaving of religion into the broad social history of the town gives a detailed and exciting picture of the social development of late nineteenth century England It shows the part that religion had to play in the life of the locality in a very different society from our own and it explores the pressures on religion in the changing phases of capitalist development This book is an essential read for scholars and researchers of religion sociology of religion and history

**Invitation to Theology** Michael Jinkins, 2001-01-26 Michael Jinkins invites you to walk through the theological maze as you follow the pattern of the Apostles Creed and consider the most profound reflections on Christian belief to be found through the ages

**Religion and Volunteering** Lesley Hustinx, Johan von Essen, Jacques Haers, Sara Mels, 2014-07-17 Religion is considered a key predictor of volunteering the more religious people are the more likely they are to volunteer This positive association enjoys significant support in current research in fact it could be considered the default perspective on the relationship between both phenomena In this book the authors claim that although the dominant approach is legitimate and essential it nonetheless falls short in grasping the full complexity of the interaction between religion and volunteering It needs to be recognized that there are tensions between religion and volunteering and that these tensions are intensifying as a result of the changing meaning and role of religion in society Therefore the central aim and contribution of this book is to demonstrate that the relationship between religion and volunteering is not univocal but differentiated ambiguous and sometimes provocative By introducing the reader to a much wider landscape of perspectives this volume offers a richer more complex and variable understanding Apart from the established positive causality the authors examine tensions between religion and volunteering from the perspective of religious obligation religious change processes of secularization and notions of post secularity They further explore how actions that are considered altruistic politically neutral and motivated by religious beliefs can be used for political reasons This volume opens up the field to new perspectives on religious actors and on how religion and volunteering are enacted outside Western liberal and Christian societies It emphasizes interdisciplinary perspectives including theology philosophy sociology political science anthropology and architecture

**Religion and Power** Professor David Martin, 2014-08-28 In this book David Martin argues against Juergen Habermas that religion and politics share a common mythic basis and that it is misleading to contrast the rationality of politics with the irrationality of religion In contrast to Richard Dawkins and New Atheists generally Martin argues that the approach taken is brazenly unscientific and that the proclivity to violence is a shared feature of religion
