Donner, 2013-04-17 Wheat has a long history of serving as an important food crop to

mankind Especially in the Northern Hemisphere it has been appreciated as a major source of energy through its carbohydrates and in more recent times for its supply of valuable proteins This combination of carbohydrates and proteins gives wheat its unique properties for making breads of different kinds of tastes During the course of history the quality of wheat has improved steadily undoubtedly for a long time by accident and for reasons little understood Over the last 150 years our knowledge has increased on farming and crop husbandry on bringing about improvements through goal oriented plant breeding and on milling and baking technology leading to the standards that we enjoy today This process will certainly continue as our knowledge of the genetic reservoir of wheat species increases The European Cereal Atlas Foundation ECAF maintains the aim of increasing and disseminating knowledge about cereal crops Within that scope ECAF has decided to publish a book on the history of bread wheat in Europe the development of associated bread making technology and the breeding of bread wheats during the twentieth century As ECAF is a Dutch foundation its Board is particularly pleased to have found three Dutch scientists willing to contribute to this volume Two of them have served wheat science in the Netherlands for their entire scientific careers spanning a period starting around 1955 and lasting for several decades of very productive wheat science development The Journal of the Department of Agriculture of Victoria Victoria. Department of Agriculture,1925 *The World Wheat Book* Alain P. Bonjean,William J. Angus,2001-01-01 The creation of new varieties of wheat in the twentieth century has resulted from a detailed understanding of genetics combined with the practical experience of breeders throughout the world This has been reinforced through evolving technologies with increased interaction with fertilizers mechanisation and modern fungicides and herbicides superseding more primitive techniques It therefore seems timely to compile a comprehensive history of wheat across all its main areas of production New laboratory techniques such as in vitro culture molecular biology and genomics now enable the development of a greater level of understanding of the complexities of the diversity structure and function of the genetics of wheat **The Journal of Agriculture** ,1925 **Scottish Journal of Agriculture** ,1926 The Journal of the Department of Agriculture, Victoria Victoria.
