*Renewable Energy Finance: Powering The Future* Charles W Donovan, 2015-06-23 The future of clean energy is no longer about science and technology it s all about access to finance The fossil fuel industry has been subsidized for decades with tax breaks and government backing while renewables have struggled to compete But now clean energy is the safe bet for investors as is argued in Renewable Energy Finance Powering the Future edited by Dr Charles Donovan Principal Teaching Fellow at Imperial College Business School With a foreword by Lord Brown and contributions from some of the

world's leading experts in energy finance this timely book documents how investors are spending over US 250 billion each year on new renewable energy projects and positioning themselves in a global investment market that will continue to expand at double digit growth rates until 2020 It documents first hand experiences of the challenges of balancing risk and return amid volatile market conditions and rapid shifts in government policy Renewable Energy Finance provides an insider's perspective on renewable energy transactions and insight into how countries like the US India and China are responding to the global energy challenge Drawing together contributions from senior executives and leading academics Renewable Energy Finance serves an audience of readers craving intelligent practical perspectives on the future of clean energy investment

Renewable Energy from Forest Resources in the United States Barry Solomon, Valerie A. Luzadis, 2008-10-30 Interest in biomass energy resources from forests farms and other sources has been rapidly increasing in recent years because of growing concern with reducing carbon dioxide emissions and developing alternatives to increasingly scarce expensive and insecure oil supplies The uniqueness of this book is its coverage of biomass energy markets in the US from an economic as well as technical perspective Existing books typically focus on single markets or technical aspects at the exclusion of economics and have given greater coverage to biomass energy outside the US This edited collection has three main parts Part One provides a historical overview of forest biomass energy use in the US the major technologies economics market prospects and policies Part Two presents forest biomass energy assessments including life cycle and sustainability perspectives and Part Three includes five sets of regional case studies After reviewing the history of wood energy use in the US and technology options the book shows that forests could displace sixteen per cent of domestic transportation fuel use in 2030 Renewable Energy from Forest Resources in the United States includes a Foreword from Chris Flavin President of the Worldwatch Institute
