AI-Oriented Competency Framework for Talent Management in the Digital Economy Alex Khang, 2024-05-29 In the digital driven economy era an AI oriented competency framework AIoCF is a collection to identify AI oriented knowledge attributes efforts skills and experiences AKASE that

directly and positively affect the success of employees and the organization. The application of skills based competency analytics and AI equipped systems is gradually becoming accepted by business and production organizations as an effective tool for automating several managerial activities consistently and efficiently in developing and moving the capacity of a company up to a world class level. AI Oriented Competency Framework for Talent Management in the Digital Economy Models Technologies Applications and Implementation discusses all the points of an AIoCF which includes predictive analytics advisory services predictive maintenance and automated processes which help to make the operations of project management personnel management or administration more efficient profitable and safe. The book includes the functionality of emerging career pathways hybrid learning models and learning paths related to the learning and development of employees in the production or delivery fields. It also presents the relationship between skills taxonomy and competency framework with interactive methods using datasets processing workflow diagrams and architectural diagrams for easy understanding of the application of intelligent functions in role based competency systems. By also covering upcoming areas of AI and data science in many government and private organizations the book not only focuses on managing big data and cloud resources of the talent management system but also provides cybersecurity techniques to ensure that systems and employee competency data are secure. This book targets a mixed audience of students engineers scholars researchers academics and professionals who are learning researching and working in the field of workforce training human resources talent management systems requirement headhunting outsourcing and manpower consultant services from different cultures and industries in the era of digital economy.

Proceedings of the International Conference on Sustainability Innovation in Computing and Engineering (ICSICE 24) S. Kannadhasan, P. Sivakumar, T. Saravanan, S. Senthil Kumar, 2025-06-24. This is an open access book. The International Conference on Sustainability Innovation in Computing and Engineering is a distinguished event that brings together leading experts researchers practitioners and innovators to explore the transformative role of computing and engineering in advancing sustainable solutions. In today's world where environmental challenges are intensifying the need for technological innovation in addressing sustainability issues has never been more urgent. This conference serves as a dynamic platform for sharing groundbreaking research showcasing innovative technologies and fostering cross disciplinary collaborations to accelerate sustainable development. With a focus on integrating sustainability into the core of computing and engineering practices this conference will delve into a wide array of topics such as sustainable computing technologies energy efficient systems green engineering practices and the role of data science in promoting sustainability. It will also highlight the latest advancements in areas like artificial intelligence smart systems and digital solutions that contribute to environmental stewardship and social equity. The conference aims to bridge the gap between theoretical research and practical application empowering participants to develop actionable strategies and innovative solutions that can be deployed in real world scenarios. By facilitating robust discussions and knowledge exchange

the conference seeks to inspire new ideas foster collaboration and catalyze the development of technologies that not only enhance efficiency and performance but also contribute to a more sustainable future It is an honor to host a gathering of visionary leaders in computing and engineering whose expertise and insights will guide the global movement toward a greener more sustainable world

Green Policies and Augmented Reality in InsurTech Sonal Trivedi,Pushan Kumar Dutta,Christo Ananth,Anuj Kumar,2026-02-23 Green Policies and Augmented Reality in InsurTech Catalysts for Sustainability and Innovation offers a timely and in depth exploration of the convergence between environmental sustainability and advanced technologies within the insurance sector

Developing Diversity, Equity, and Inclusion Policies for Talent Acquisition and Retention Idris, Sofia,2026-02-18 In today s competitive and socially conscious job market developing robust diversity equity and inclusion DEI policies becomes essential for attracting and retaining talent Organizations that prioritize DEI in their talent acquisition and retention strategies may foster a more inclusive and equitable workplace culture while gaining access to a broader range of perspectives skills and experiences These policies are integral to building trust enhancing employee engagement and driving innovation As workforces become more diverse and values driven companies that embed DEI principles into their hiring and retention practices are better positioned for long term success and meaningful impact Developing Diversity Equity and Inclusion Policies for Talent Acquisition and Retention explores how organizations can design and implement effective DEI policies to create fair and inclusive hiring practices It examines the impact of these policies on attracting diverse talent improving employee retention and fostering a more innovative and equitable workplace culture This book covers topics such as employee retention organizational behavior and inclusive business and is a useful resource for business owners policymakers academicians researchers and scientists

Description of a Framework of Macropfiles (archetypes) Corrado Paracone,Nicola Schiavone,Franco Uberto,1991 Recoge 1 The dimensions os office work 2 Division of labour and classification 3 Comparison of office and factory work 4 Developments in office work 5 The relation between technology and organization ans the structure of job skills 6 New job skill contents and new industrial relations and training problems 7 Archetypes of reference training methods pinpointing job skills in the production service sector

Automatic and Remote Control International Federation of Automatic Control,1960

Home Digital Twins Tuan Anh Nguyen,2026-02-20 Home Digital Twins explores how digital twin technologies can serve as a bridge between the real home and the virtual home It explains how IoT devices wearable sensors artificial intelligence AI and machine learning ML can aid in the diagnosis prediction and prevention of abnormal critical extreme problems in real home environments while also showing how digital twin computing can support the management of home energy consumption to optimize everyday living The book also considers the security and ethical implications of introducing digital twin technology in the home to ensure the technology benefit the lives of the home s inhabitants The introduction of sensor networks into the home environment allows automation into the home utilizing internet of things IoT devices to program for example door

opening room luminosity room temperature and humidity Digital Twin technology extends the capabilities of the smart home collecting and analyzing data from the Activities of Daily Living ADLs and applying Human Activity Recognition HAR algorithms to provide adaptive services including minimizing power consumption improving healthcare and enhancing overall well being However there are many challenges when applying these algorithms to the smart home due to the variability and sparsity of sensor data which can lead to a mismatch between the real home and the digital home Explains how digital twins gather real home data to create a virtual model of the home Considers the associated technologies that support home digital twins including Internet of things artificial intelligence machine learning and blockchain Explores how digital twins can be used in the home to monitor and improve our daily lives **JPRS Report** ,1989 **African Newsletter on Occupational Health and Safety** ,2003-04 A Framework to Organize and Classify Predictive Tools for Construction Project Managers James R. Arneson,1994 **Ethics and Technology** Herman T. Tavani,2004 Explores current issues in the field of cyberethics including questions about onlinepersonal privacy sharing music and unreliable software and analyzes the practical moral and legal implications of each issue **Annual Review and Planning Framework for Telecommunications in the Government of Canada** ,1984 Domain-Specific Application Frameworks Mohamed E. Fayad,Ralph E. Johnson,2000 Object Technology An invaluable collection of domain specific frameworks Domain Specific Application Frameworks Frameworks provide generic software architectures that can be reused indefinitely to generate new applications But they don t readily translate from one business or industry domain to another A telecommunications framework looks very different from a currency trading framework for instance Developers need instruction on how to build frameworks specific to the domains for which they program Now this book CD ROM package gives developers models and much more Each chapter is built around a case study reporting a major framework implementation or customization project The 30 examples contained in the book cover an array of application domains including Flexible manufacturing architectures Computer integrated manufacturing New generation control systems Concurrent engineering Reliable distributed computing High performance Web servers Multimedia telecommunications Networking and telecommunications Industrial visualization And many others The enclosed CD ROM gives you Example frameworks Documentation and manuals Framework code and implementation tips Sample framework architectures and models Design patterns and presentations Animated demonstrations *Digital Nomads. How the era of digitalization creates alternative lifestyles* Lisa-Marie Wagner,2020-06-18 Bachelor Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1 6 language English abstract In this paper the phenomenon of digital nomadism in permanent employment is presented In general digital nomads are characterized by their independence of location their employment in the digital space and common values Most of them are freelancers and entrepreneurs but also employees who are part of this movement want to leave the conservative concept of normal employment and break new ground First the changes in the business world and the

emergence of digital nomadism were presented in this paper Due to a lack of literature guideline based expert interviews were conducted to gain insight into the opportunities and risks of the multi local lifestyle concept for employees and companies In addition the framework conditions for companies and digital nomads required by this work and life concept were examined and presented in detail Such a framework condition can mean for example the adaptation of processes and leadership There are also differences between completely remote companies and only partially remote companies which can lead to a split company structure In this context the similarities and differences between traditional telework and digital nomadism in permanent employment were also examined These are similar for example regarding the technical prerequisites that should be created in companies and the changed communication In addition there are challenges and opportunities that arise from the travel component and the nature of digital nomadism such as negatively impaired processes due to time differences or certain characteristics and experiences that digital nomads possess or experience that can be used positively in a professional context Thus this work not only serves a scientific purpose but also provides a practical framework for employing digital nomads in traditional companies
