Glacier-influenced Sedimentation on High-latitude Continental Margins J. A. Dowdeswell, C. Ó Cofaigh, 2002 This

book examines the process and patterns of glacier influenced sedimentation on high latitude continental margins and the geophysical and geological signatures of the resulting sediments and landforms It contains a range of papers concerning modern and glacially influenced sedimentation in high latitude areas from both hemispheres many of which discuss the relationship between glacier dynamics and the sediments and landforms preserved in the glacial marine environment *A Study of the Relationships Between Slope Morphology and Regolith Characteristics of Chalk Slopes in Southern England* Gillian Margaret KENT,1976 **The Spatial Distribution of Hillslope Form and Process in Selected Driftless Area Watersheds, Southwestern Wisconsin** Thomas Wayne Small,1973 **Slope Tectonics** Michel Jaboyedoff,2011 Usually geomorphology structural geology and engineering geology provide descriptions of slope instability in quite distinctive ways This new research is based on combined approaches to providing an integrated view of the operative slope processes Slope Tectonics is the term adopted here to refer to those deformations that are induced or fully controlled by the slope morphology and that generate features which can be compared to those created by tectonic activity Such deformation can be induced by the stress field in a slope which is mainly controlled by gravity topography and the geological setting created by the geodynamic context The content of this book includes slope deformation characterization using morphology and evolution mechanical behaviour of the material modes of failure and collapse influence of lithology and structural features and the role played by controlling factors The contributions cover broad aspects of slope tectonics that attempt to underline a multidisciplinary approach which should create a better framework for studies of slope instability **Journal of Sedimentary Petrology** ,1976 *The Himalaya, Nature, Man and Culture* O.
