Brown,1995 At the end of the Second World War the Director of Naval Construction set the various design teams within his department the task of recording their wartime activities All types were covered from the largest fleet carrier to the humblest tug and the short summaries described the principal achievements of each design and distilled the lessons of combat By a quirk of history these essays were never published so that this superb set of three volumes is the first complete publication The contemporary illustrations intended for inclusion have been lost but a fine new selection is here incorporated and the editor of the series D K Brown has added footnotes to explain obscure references and technical jargon This second volume includes submarines corvettes and frigates fleet mine sweepers and motor torpedo boats and for those interested in the rationale of design and the performance of warships in battle it unlocks a vast source of fascinating and authentic original material upon which so much of postwar interpretation and analysis has been based
